

- 95 Cytological Features of Developing Anthers in Rose Balsam
Shujuan Yang, Li Peng, Han Bao, and Huiqiao Tian
- 101 Litchi Flowering is Regulated by Expression of *Short Vegetative Phase* Genes
Jiaqi Hu, Hye-Ji Kim, Houbin Chen, and Biyan Zhou
- 110 Current Season Photoassimilate Distribution in Sweet Cherry
Marlene Ayala and Gregory Lang
- 118 Characterization of Various Color Parameters (Anthocyanins and Flavonols) of Leaves and Flowers in Different Autochthonous Genotypes of *Cyclamen purpurascens*
Gregor Osterc, Maja Mikulic Petkovsek, Franci Stampar, Biljana Kiprovski, Blanka Ravnjak, and Joze Bavcon
- 130 Factors Influencing Cross Barriers in Interspecific Hybridizations of Water Lily
Chunqing Sun, Zhihu Ma, Zhenchao Zhang, Guosheng Sun, and Zhongliang Dai
- 136 Variations in Genome Size of Turnip Landraces from Two High-altitude Environments
Supriyo Basak, Guangyan Wang, Xudong Sun, and Yongping Yang
- 144 Differences in Photosynthesis of Variegated Temple Bamboo Leaves with Various Levels of Variegation are Related to Chlorophyll Biosynthesis and Chloroplast Development
Lingyan Chen, Jinli Lai, Tianyou He, Jundong Rong, Muhammad Waqqas Khan Tarin, and Yushan Zheng
- 154 Senescence and Abiotic Stress Induce Expression of Autophagy-related Genes in *Petunia*
Juan O. Quijia Pillajo, Laura J. Chapin, and Michelle L. Jones
