

CONTENTS

Abstracted/indexed in: ISI SciSearch(c), ISI Science Citation Index Expanded(c) and ISI Current Contents(c) Agricultural, Biological and Environmental Sciences. Also covered in the abstract and citation database Scopus®. Full text available on ScienceDirect®

Composition of basal area in natural forests based on the uniform angle index G. Zhang, G. Hui, Z. Zhao, Y. Hu, H. Wang, W. Liu and R. Zang	1	An onion-like movement corridor? Possible guidelines emerging from small-scale movement rules T. Delattre, J. Baudry and F. Burel	48
Hidden variables in a Dynamic Bayesian Network identify ecosystem level change L. Uusitalo, M.T. Tomczak, B. Müller-Karulis, I. Putnis, N. Trifonova and A. Tucker	9	Assessing the river habitat suitability and effects of introduction of exotic fish species based on aneco-hydraulic model system W. Yao, T. Zhao, Y. Chen, G. Yu and M. Xiao	59
Identifying disturbed habitats: A new method from acoustic indices W.E. Gómez, C.V. Isaza and J.M. Daza	16	Habitat suitability modelling for predicting potential habitats of freshwater snail intermediate hosts in Omo-Gibe river basin, Southwest Ethiopia G. Yigezu, B. Mandefro, Y. Mengesha, D. Yewhalaw, A. Beyene, M. Ahmednur, Y. Abdie, H. Kloos and S.T. Mereta	70
Small values in big data: The continuing need for appropriate metadata C.A. Stow, K.E. Webster, T. Wagner, N. Lottig, P.A. Soranno and Y. Cha	26	Accumulation of marine microplastics along a trophic gradient as determined by an agent-based model R.L. Griffin, I. Green and R. Stafford	81
Bayesian spatiotemporal dynamic models for regional dynamics of avian populations G. Wang	31		
Drought and weir construction impact stationarity assumption in watershed water quality modeling in South Korea S. Kim	38
