

CONTENTS

Research Reports

- Effects of isolated soy protein and broken rice in corn-soy pre-starter diet on performance, intestinal microflora, and gut morphology in broiler chickens**
Ali Nabizadeh, Abolghasem Golian, Ahmad Hassanabadi, and Saeed Zerehdaran 133
- Evaluation of dried vegetable residues for poultry: III Effects of feeding cabbage leaf residues on laying performance, egg quality, and apparent total tract digestibility**
A. F. Mustafa and B. Baurhoo 145
- Effect of dietary lysine level on performance, egg quality and serum biochemical indices of laying pigeons**
Ling-ling Chang, Peng Xie, Zhu Bu, Qing Wang, Sheng-yong Fu, and Chun-yu Mu 152
- Response of broiler chickens to processed soy protein product when offered at different inclusion levels in mash or crumbled prestarter diets**
A. A. Omede and P. A. Iji 159
- Impact of meat and bone meal nutritional variability on broiler performance**
C. Eagleson, T. Clark, B. Hill, B. Daniels, A. Eagleson, H. L. Goodwin, Jr., and S. Watkins 172
- Evaluation of layer cage cleaning and disinfection regimens**
D. White, S. Gurung, D. Zhao, Y. Farnell, J. Byrd, S. McKenzie, D. Styles, and M. Farnell 180
- Effects of cassava pulp fermented with *Aspergillus oryzae* as a feed ingredient substitution in laying hen diets**
S. Okrathok, P. Pasri, R. Thongkratok, W. Molee, and S. Khempaka 188
- Effect of litter density and foot health program on ammonia emissions in broiler chickens**
J. M. Cohuo-Colli, J. Salinas-Ruíz, A. S. Hernández-Cázares, J. V. Hidalgo-Contreras, V. H. Brito-Damián, and J. Velasco-Velasco 198
- Effects of yeast fermentation product inclusion during the brooder phase and grower/finisher phase feed form effects on large tom performance using feed produced at a commercial mill**
K. G. S. Wamsley and J. S. Moritz 206
- Meat quality characteristics of fast-growing broilers reared under different types of pasture management: Implications for organic and alternative production systems (Part II)**
A. Woo-Ming, K. Arsi, J. R. Moyle, V. B. Gaunsalis, C. M. Owens, F. D. Clark, A. Fanatico, A. Upadhyay, D. J. Donoghue, and A. M. Donoghue 215
- Detecting *Campylobacter coli* in young chicks using two different cloacal swab techniques**
B. L. McLendon, N. A. Cox, D. E. Cosby, E. R. Montiel, S. M. Russell, C. L. Hofacre, M. A. Landrum, J. S. Jackson, and J. L. Wilson 223

| | |
|--|-----|
| Evaluation of NSPase inclusion in diets manufactured with high- and low-quality corn on male broilers | |
| H. G. Walters, B. Brown, N. Augspurger, R. Brister, S. Rao, and J. T. Lee | 228 |
| Effects of modifying diet and feed manufacture concern areas that are notorious for decreasing pellet quality | |
| T. R. Rigby, B. G. Glover, K. L. Foltz, J. W. Boney, and J. S. Moritz | 240 |
| Effect of eggshell temperature on survival rate, development at hatch, and 7-day growth | |
| J. C. Lopez, Lisa Kitto, and R. M. Hulet | 249 |

Field Reports

| | |
|--|-----|
| Molecular epidemiologic survey of infectious bursal disease viruses in broiler farms raised under different vaccination programs | |
| E. C. Muniz, R. Verdi, D. J. Jackwood, D. Kuchpel, M. S. Resende, J. C. Q. Mattos, and K. Cookson | 253 |
| Identifying dead-on-arrivals (DOA) at shackling in a slaughter line gas stunning system for end-of-lay hens: Part I - Hock flexion resistance and wing position | |
| R. M. Ouckama, F. Salgado-Bierman, M. T. Guerin, and M. L. Brash | 262 |
| Identifying dead-on-arrivals (DOA) at shackling in a slaughter line gas stunning system for end-of-lay hens: Part II - Proof of concept for detecting simulated change in hock flexion resistance | |
| R. M. Ouckama, F. Salgado-Bierman, M. T. Guerin, and M. L. Brash | 272 |

Corrigendum

| | |
|--|-----|
| Corrigendum to “Poultry carcass visceral contour recognition method using image processing” | |
| Y. Chen and S. C. Wang | 278 |
