

Canadian Journal of Plant Science

- 235–246 Extending the growing season: forage seed production and perennial grains Douglas J. Cattani and Sean R. Asselin
- 247–254 Annual and perennial forages for fall/winter grazing in western Canada E.J. McGeough, D.J. Cattani, Z. Koscielny, B. Hewitt, and K.H. Ominski
- 255–266 A nutrient-based sustainability assessment of purpose-grown poplar and switchgrass biomass production systems established on marginal lands in Canada Muhammad Waseem Ashiq, Amir Behzad Bazrgar, Houman Fei, Brent Coleman, Kevin Vessey, Andrew Gordon, Derek Sidders, Tim Keddy, and Naresh Thevathasan
- 267–277 Extending the growing season: winter cereals in western Canada R.J. Larsen, B.L. Beres, R.E. Blackshaw, and R.J. Graf
-

Articles

- 279–287 Differential expression of 12 NBS-encoding genes in two apple cultivars in response to *Alternaria alternata* f. sp. *mali* infection Xiaoxuan Hu, Yan Zhong, Kaihui Huang, Sanhong Wang, Qunkang Cheng, and Zong-Ming Cheng
- 288–299 Identification and expression analysis of *LATERAL ORGAN BOUNDARIES DOMAIN (LBD)* transcription factor genes in *Fragaria vesca* Xiaodong Chen, Jing Wang, Mizhen Zhao, and Huazhao Yuan
- 300–308 Differential response of plant species to greenhouse microclimate created by design technology and ambient conditions Lord Abbey and Sajjad Ali Rao

309–317	A MADS-box gene associated with protocorm-like body formation in <i>Rosa canina</i> alters floral organ development in <i>Arabidopsis</i>	Kedong Xu, Kun Liu, Jianxin Wu, Wei Wang, Yuling Zhu, Chunjing Li, Mengzhu Zhao, Youwei Wang, Chengwei Li, and Liangjun Zhao
318–331	Comparison of morphological features of fruits and seeds for identifying two taxonomic varieties of <i>Spinacia oleracea</i> L.	Shuchun Meng, Changjiang Liu, Xiuping Xu, Songquan Song, Shunhua Song, Zhenxian Zhang, and Ling Liu
332–344	Impact of a clover cover crop combined with organic or mineral fertilizer on yield and nitrogen uptake of canola	Mathieu Vaillancourt, Martin Chantigny, Denis Pageau, and Anne Vanasse
345–352	Linuron-resistant common ragweed (<i>Ambrosia artemisiifolia</i>) populations in Québec carrot fields: presence and distribution of target site and non-target site resistant biotypes	Marie-Josée Simard, Martin Laforest, Brahim Soufiane, Diane Lyse Benoit, and François J. Tardif
353–361	Gynogenesis and doubled haploid production from unpollinated ovary culture of cucumber (<i>Cucumis sativus</i> L.)	A. Sorntip, O. Poolsawat, C. Kativat, and P.A. Tantasawat
362–369	Control of glyphosate-resistant waterhemp (<i>Amaranthus tuberculatus</i> var <i>rudis</i>) with dicamba and dimethenamid-P in Ontario	Mike G. Schryver, Nader Soltani, David C. Hooker, Darren E. Robinson, Patrick J. Tranel, and Peter H. Sikkema
370–379	Weed control, environmental impact, and net revenue of two-pass weed management strategies in dicamba-resistant soybean	Matthew G. Underwood, Nader Soltani, Darren E. Robinson, David C. Hooker, Clarence J. Swanton, Joseph P. Vink, and Peter H. Sikkema
380–394	Effects of growth-promoters on the productivity of <i>Arundo donax</i> L. (NileFiber™) as a purpose-grown biofuel feedstock in Nova Scotia	Emily G. Peters, Houman Fei, Yousef A. Papadopoulos, and J. Kevin Vessey
395–407	Yield and nutritive value of binary legume–grass mixtures under grazing or frequent cutting	Gilles Bélanger, Gaëtan F. Tremblay, Yousef A. Papadopoulos, John Duynisveld, Julie Lajeunesse, Carole Lafrenière, and Sherry A.E. Fillmore
408–424	Selected forage crops control foxtail barley and downy brome in saline soils	Harold Steppuhn, Ken G. Wall, Alan D. Iwaasa, Robert E. Blackshaw, Rob Dunn, and Dianne Westerlund
425–431	Control of wild carrot (<i>Daucus carota</i> L.) in corn, soybean, and winter wheat	Nader Soltani, Christy Shropshire, and Peter H. Sikkema
432–443	Performance of five haskap (<i>Lonicera caerulea</i> L.) cultivars and the effect of hexanal on postharvest quality	John O. MacKenzie, Evan M.A. Elford, Jayasankar Subramanian, Rob W. Brandt, Katherine E. Stone, and J. Alan Sullivan
444–456	Tissue distribution of avenanthramides and gene expression of hydroxycinnamoyl-CoA: hydroxyanthranilate <i>N</i> -hydroxycinnamoyl transferase (HHT) in benzothiadiazole-treated oat (<i>Avena sativa</i>)	Mitchell L. Wise

457-466 Three-dimensional reconstruction of maize roots and quantitative analysis of metaxylem vessels based on X-ray micro-computed tomography Xiaodi Pan, Liming Ma, Ying Zhang, Jinglu Wang, Jianjun Du, and Xinyu Guo

Cultivar descriptions

467-474 AAC Goldrush hard red winter wheat R.J. Graf, B.L. Beres, R.J. Larsen, H.S. Randhawa, D.A. Gaudet, A. Laroche, F. Eudes, and N.A. Foroud

475-482 AAC Prevail Canada Western Red Spring wheat S. Kumar, S.L. Fox, D.G. Humphreys, J. Mitchell Fetch, D. Green, T. Fetch, B. McCallum, and J. Menzies

483-491 AAC Congress durum wheat Y. Ruan, A.K. Singh, R.M. DePauw, R.E. Knox, T.N. McCaig, R.D. Cuthbert, B. McCallum, T. Fetch, and B. Beres

Short communications

492-497 Distribution of glyphosate and cloransulam-methyl resistant Canada fleabane [*Conyza canadensis* (L.) Cronq.] in Ontario Christopher M. Budd, Nader Soltani, Darren E. Robinson, David C. Hooker, Robert T. Miller, and Peter H. Sikkema

498-500 Cereal rye cover crop suppresses winter annual weeds Rodrigo Werle, Charles Burr, and Humberto Blanco-Canqui

501-504 Nutritive value of sweet pearl millet and sweet sorghum as influenced by N fertilization Gilles Bélanger, Marie-Noëlle Thivierge, Martin H. Chantigny, Philippe Seguin, and Anne Vanasse

505-508 Impact of 1-methylcyclopropene and controlled atmosphere on the quality of stored 'AC Harrow Crisp' pears Geoffrey B. Lum, Jennifer R. DeEll, Barry J. Shelp, and Gale G. Bozzo

509-514 Frost tolerance of faba bean cultivars (*Vicia faba* L.) in central Alberta Boris Henriquez, Mark Olson, Christy Hoy, Mason Jackson, and Ton Wouda

Corrigendum

515 Corrigendum: In vitro propagation of cherry birch (*Betula lenta* L.) Ricki Rathwell, Mukund R. Shukla, A. Maxwell P. Jones, and Praveen K. Saxena

Retraction

516 Retraction: Short Communication: Organogenesis and somatic embryogenesis in callus derived from HBsAg-transgenic tomato mutant Zheng-jun Guan, Bin Guo, Yan-lin Huo, Zheng-ping Guan, Jia-kun Dai, and Ya-hui Wei
