

Canadian Journal of Animal Science

Reviews

- 405-415 Influence of selected factors on meat quality from farm-raised and wild fallow deer (*Dama dama*): a review
Marta Bykowska
- 416-432 Injury and mortality in broilers during handling and transport to slaughter
Michael S. Cockram and Ketan Jung Dulal
-

Articles

- 433-442 Effects of a matrix-coated organic acids and medium-chain fatty acids blend on performance, and in vitro fecal noxious gas emissions in growing pigs fed in-feed antibiotic-free diets
M.M. Hossain, B. Jayaraman, S.C. Kim, K.Y. Lee, I.H. Kim, and C.M. Nyachoti
- 443-452 Evaluation of sensory attributes of Hanwoo *Longissimus dorsi* muscle and its relationships with intramuscular fat, shear force, and environmental factors
Chandima Gajaweera, Ki Yong Chung, Eung Gi Kwon, In Ho Hwang, Soo Hyun Cho, and Seung Hwan Lee
- 453-462 Efficacy of genetic parameter estimation of pork loin quality of crossbred commercial pigs using technological quality measurements of frozen and unfrozen product
Huaigang Lei, Chunyan Zhang, Changxi Li, Graham S. Plastow, and Heather L. Bruce
- 463-476 In vitro assessment of the starch digestibility of western Canadian wheat market classes and cultivars
Namalika D. Karunaratne, Dawn A. Abbott, Ravindra N. Chibbar, Pierre J. Hucl, Curtis J. Pozniak, and Henry L. Classen

477–487	Impact of strain and dose of live yeast and yeast derivatives on in vitro ruminal fermentation of a high-grain diet at two pH levels	P.X. Jiao, Z.X. He, S. Ding, N.D. Walker, Y.Y. Cong, F.Z. Liu, K.A. Beauchemin, and W.Z. Yang
488–497	Influence of low-protein diets and protease and bromelain supplementation on growth performance, nutrient digestibility, blood urine nitrogen, creatinine, and faecal noxious gas in growing–finishing pigs	D.H. Nguyen, S.I. Lee, J.Y. Cheong, and I.H. Kim
498–507	Model development: establishing pigs with homogenous microbial profile in the hind gut	Tadele G. Kiros, Eric Pinloche, Romain D’Inca, Eric Auclair, and Andrew Van Kessel
508–516	Castor bean cake detoxified with calcium hydroxide in diets for pigs at growing and finishing phases	Taisa Rocha Gomes da Silva, Leonardo Augusto Fonseca Pascoal, Fernando Guilherme Perazzo Costa, Pedro Henrique Watanabe, and Terezinha Domiciano Dantas Martins
517–524	Metabolizable energy and standardized ileal digestible amino acid contents of a high-protein sunflower meal fed to broiler chicks	S.M. Waititu, J.W. Kim, N. Sanjayan, P. Leterme, and C.M. Nyachoti
525–537	Identification of serum metabolites associated with the risk of metritis in transition dairy cows	Dagnachew Hailemariam, Guanshi Zhang, Rupasri Mandal, David S. Wishart, and Burim N. Ametaj
538–547	Effects of the lipid-coated zinc oxide dietary supplement on intestinal mucosal morphology and gene expression associated with the gut health in weanling pigs challenged with enterotoxigenic <i>Escherichia coli</i> K88	Jeong Hee Han, Min Hye Song, Ha Na Kim, Insurk Jang, C. Young Lee, and Byung-Chul Park
548–556	Estimation of direct and maternal genetic parameters for individual birth weight and probe weight using cross-fostering information	K. Alves, F.S. Schenkel, L.F. Brito, and J.A.B. Robinson
557–564	The effect of carcass weight on chemical characteristics and fatty acid composition of <i>Longissimus dorsi</i> and <i>Semimembranosus</i> muscles of European wild boar (<i>Sus scrofa scrofa</i>) meat	Martyna Batorska, Justyna Więcek, Małgorzata Kunowska-Słószarz, Kamila Puppel, Jan Słószarz, Marcin Gołębiewski, Beata Kuczyńska, Bartłomiej Popczyk, Anna Rekiel, and Marek Balcerak
565–575	A comprehensive comparison between single- and two-step GBLUP methods in a simulated beef cattle population	Mario L. Piccoli, Luiz F. Brito, José Braccini, Fernanda V. Brito, Fernando F. Cardoso, Jaime A. Cobuci, Mehdi Sargolzaei, and Flávio S. Schenkel
576–588	<i>Saccharomyces cerevisiae</i> var. <i>boulardii</i> CNCM I-1079 and <i>Lactobacillus acidophilus</i> BT1386 influence innate immune response and serum levels of acute-phase proteins during weaning in Holstein calves	Bridget E. Fomenky, Johanne Chiquette, Martin Lessard, Nathalie Bissonnette, Guylaine Talbot, Yvan P. Chouinard, and Eveline M. Ibeagha-Awemu

Short communications

- | | | |
|---------|---|---|
| 589-592 | The level of feed intake does not influence digestibility of calcium and phosphorus in diets fed to gestating sows, but gestating sows have reduced digestibility of calcium and phosphorus compared with growing gilts | S.A. Lee, G.A. Casas, and H.H. Stein |
| 593-596 | Estimating gas volume from headspace pressure in a batch culture system | Atmir Romero-Pérez and Karen A. Beauchemin |
| 597-602 | Accuracy of predicting chemical body composition of gilts and sows | E.G. Miller, L. Huber, C.L. Levesque, and C.F.M. de Lange |
| 603-605 | Variability in daily urinary nitrogen excretion of gestating gilts does not affect estimates of nitrogen retention | E.G. Miller, L. Huber, C.L. Levesque, and C.F.M. de Lange |
