

TRENDS IN FOOD SCIENCE & TECHNOLOGY

REVIEWS

- Milk fatty acids and potential health benefits: An updated vision** by Pilar Gómez-Cortés, Manuela Juárez and Miguel Angel de la Fuente 1
- Improvers and functional ingredients in whole wheat bread: A review of their effects on dough properties and bread quality** by Lauren Tebben, Yanting Shen and Yonghui Li 10
- Structuring processes for meat analogues** by Birgit L. Dekkers, Remko M. Boom and Atze Jan van der Goot 25
- Stingless bee honey: Quality parameters, bioactive compounds, health-promotion properties and modification detection strategies** by Suelen Ávila, Márcia Regina Beux, Rosemary Hoffmann Ribani and Rui Carlos Zambiasi 37
- Use of encapsulated natural compounds as antimicrobial additives in food packaging: A brief review** by Micheli Zanetti, Thaís Karoline Carniel, Francieli Dalcanton, Raul Silva dos Anjos, Humberto Gracher Riella, Pedro H.H. de Araújo, Débora de Oliveira and Marcio Antônio Fiori 51
- Conventional and emerging detection techniques for pathogenic bacteria in food science: A review** by Saima Hameed, Lijuan Xie and Yibin Ying 61
- The improvements of functional ingredients from marine foods in lipid metabolism** by Teng Wang, Changhu Xue, Tiantian Zhang and Yuming Wang 74

(Contents continued overleaf)

(contents continued)

Colorimetric sensor arrays based on chemo-responsive dyes for food odor visualization by Huang Xiao-wei, Zou Xiao-bo, Shi Ji-yong, Li Zhi-hua and Zhao Jie-wen	90
Fractionation of polysaccharides by gradient non-solvent precipitation: A review by Xiuting Hu and H. Douglas Goff	108
Biotechnological routes for transglutaminase production: Recent achievements, perspectives and limits by Limin Wang, Bo Yu, Ruixuan Wang and Jianchun Xie	116
Chemical and biological properties of feijoa (<i>Acca sellowiana</i>) by Fan Zhu	121
Food smuggling and trafficking: The key factors of influence by Jan Mei Soon and Louise Manning	132
Removing and detoxifying methods of patulin: A review by Enjie Diao, Hanxue Hou, Weicheng Hu, Haizhou Dong and Xiangyang Li	139
Is gut microbiota a relevant and competitive dietary target for cardio-metabolic health? Proceedings of an expert workshop by Elke A. Trautwein, Harry P.F. Peters, David J. Mela, Christine Edwards, Hilde Herrema, Jingyuan Fu, Marian Geldof and Ruud Albers	146
Microbial food safety in the 21st century: Emerging challenges and foodborne pathogenic bacteria by Charles M.A.P. Franz, Heidi M.W. den Besten, Christina Böhnlein, Manfred Gareis, Marcel H. Zwietering and Vincenzina Fusco	155
Critical assessment of formulation, processing and storage conditions on the quality of alveolar baked products determined by different analytical techniques: A review by Zeineb Nhouchi, Eliot Patrick Botosoa and Romdhane Karoui	159
Cocoa (<i>Theobroma cacao</i> L.) pod husk: Renewable source of bioactive compounds by Rocio Campos-Vega, Karen H. Nieto-Figueroa and B. Dave Oomah	172
Viability of commercial cucumber fermentation without nitrogen or air purging by Yawen Zhai, Ilenys M. Pérez-Díaz and Joscelin T. Diaz	185
A review on technological parameters and recent advances in the fortification of processed cheese by Grace Talbot-Walsh, David Kannar and Cordelia Selomulya	193
Focus on gluten free biscuits: Ingredients and issues by Maria Di Cairano, Fernanda Galgano, Roberta Tolve, Marisa Carmela Caruso and Nicola Condelli	203
Challenges and solutions of optical-based nondestructive quality inspection for robotic fruit and vegetable grading systems: A technical review by Baohua Zhang, Baoxing Gu, Guangzhao Tian, Jun Zhou, Jichao Huang and Yingjun Xiong	213
Reciprocal interactions between resveratrol and gut microbiota deepen our understanding of molecular mechanisms underlying its health benefits by Liang Shen and Hong-Fang Ji	232
