

Canadian Journal of Animal Science

Articles

- 607–618 Effects of diets containing linseed oil or lard and supplemented with pumpkin seeds on oxidative status, blood serum metabolites, growth performance, and meat quality of naked neck chickens
G. Meineri, E. Longato, and P.G. Peiretti
- 619–630 Assessing the response of hen weight, body composition, feather score, egg quality, and level of excreta nitrogen content to digestible balanced protein intake of laying hens
D. Kumar, C. Raginski, K. Schwean-Lardner, and H.L. Classen
- 631–641 Interrelationships among plasma metabolites, production, and ovarian follicular function in dairy cows
K. Macmillan, A. Hayirli, L. Doepel, B.L. Dyck, E. Subramaniam, D.J. Ambrose, and M.G. Colazo
- 642–655 Genomic retained heterosis effects on fertility and lifetime productivity in beef heifers
J.A. Basarab, J.J. Crowley, M.K. Abo-Ismael, G.M. Manafiazar, E.C. Akanno, V.S. Baron, and G. Plastow
- 656–666 High-fibre high-lipid by-product pellets containing calcium oxide-treated oat hulls as a partial replacement for barley grain in finishing diets for beef cattle
J.A. Johnson, F. Joy, J.J. McKinnon, and G.B. Penner
- 667–674 Regulatory role of *LEF-1* in the proliferation of Arbas White Cashmere goat dermal papilla cells
Fei Hao, Wei Yan, Xiaodong Guo, Bing Zhu, and Dongjun Liu
