

# Marine Biology Research

Volume 15 - Numbers 4-6 - Pages 305 - 375 2019

## Contents

### ORIGINAL ARTICLE

- Habitat use models of spatially auto-correlated data: a case study of the common bottlenose dolphin, *Tursiops truncatus truncatus*, in southeastern Brazil  
*Rodrigo H. Tardin, Yongwan Chun, Sheila M. Simão and Maria Alice S. Alves* 305

### REPORT

- DNA Barcoding of polychaetes collected during the 2018 Rapid Assessment Survey of floating dock communities from New England  
*Andrew A. David and Michael Krick* 317

### ORIGINAL ARTICLES

- The effect of temperature change and oxygen reduction on zooplankton composition and vertical distribution in a semi-enclosed marine system  
*Davor Lučić, Marijana Hure, Svjetlana Bobanović-Ćolić, Jakica Njire, Olja Vidjak, Ivona Onofri, Barbara Gangai Zovko and Mirna Batistić* 325
- Molecular characterization of heat shock protein 90 from the dinoflagellate *Prorocentrum donghaiense* and its transcriptional response to thermal, copper and nutrient stresses  
*Chun Y. Zhang, Guo F. Chen, Yuan Y. Wang, Xu D. Zhang and Cheng H. Li* 343
- Composition of natural phytoplankton community has minor effects on autochthonous dissolved organic matter characteristics  
*Lumi Haraguchi, Eero Asmala, Hans H. Jakobsen and Jacob Carstensen* 357
