

Virology/Virologie

Detection by high-throughput sequencing and molecular characterization of complexes of fabaviruses infecting 'Staccato^(R)' sweet cherry (*Prunus avium*) in Canada
D. James, J. Phelan and D. Sanderson 519

Detection of potyviruses infecting Iranian common beans using broad-spectrum antibodies and universal primer pairs
H. Valouzi, A. Golnaraghi, S.-S. Hashemi, L. Abedini-Aminabad and S. Yazdani-Khameneh 535

Identification of *Tomato yellow leaf curl virus*, *Pepper huasteco yellow vein virus* and *Pepper golden mosaic virus* associated with pepper diseases in northern Mexico
J. J. Morales-Aguilar, E. A. Rodríguez-Negrete, E. Camacho-Beltrán, C. A. López-Luque,
N. E. Leyva-López, F. Jiménez-Díaz, A. Voloudakis, M. E. Santos-Cervantes and J. Méndez-Lozano 544

Analysis of the genetic diversity of genome sequences of variants of apple hammerhead viroid
D. Sanderson and D. James 551

Forest pathology/Pathologie forestière

Heterobasidion species detected using High Throughput Sequencing (HTS) methods on British Columbia nursery plants
J. A. Bérubé, P. N. Gagné, J. P. Ponchart, J. Phelan, A. Varga and D. James 560

Epidemiology/Épidémiologie

A real-time PCR assay for detection of light leaf spot on *Brassica* crops in the Pacific Northwest of the USA
W. J. Thomas, M. Serdani, B. Claassen, M. Schneider, A. M. Hinds-Cook, C. Mallory-Smith
and C. M. Ocamb 566

Relationship between *Verticillium dahliae* inoculum and sunflower wilt in Argentina
I. A. Erreguerena, R. Rojo, F. J. Quiroz, G. E. Clemente and A. R. Escande 576

Soilborne pathogens/Agents pathogènes telluriques

Long-term effects of dryland and irrigation production systems on soil *Fusarium* communities in wheat
B. Liu, H. Wei, W. Shen, H. Smith and J. C. Correll 585

Validation of extraction methods for diagnosis of the stem and bulb nematode *Ditylenchus dipsaci*
S. Poirier, N. Dauphinais, G. Bélair, V. Gravel and B. Mimee 597
