## Contents

### Ecology and conservation

**Preadaptation to the vertical: an extra dimension to the natural history and nesting habits of the Tree Bumble Bee, *Bombus (Pyrobombus) hypnorum***

Oliver Prŷs-Jones

643

**Pruned petioles of papaya as nesting sites of the leafcutting bee, *Megachile laticeps* Smith and its pollen fidelity**

Amala Udayakumar, Timalapur M. Shivalingaswamy, Veeresh Kumar, and M. Pratheepa

660

**Are there risks to wild European bumble bees from using commercial stocks of domesticated *Bombus terrestris* for crop pollination?**

David Chandler, Emily Cooper, and Gill Prince

665

**Abrupt decrease in the diversity of Euglossini bees (Hymenoptera: Apidae) in a montane rainforest**

Alessandra Ribeiro Pinto, Guilherme do Carmo Silveira, Maria Cristina Gaglianone, and Leandro Freitas

682

**Local honey bees (*Apis mellifera*) have lower pathogen loads and higher productivity compared to non-local transplanted bees in North America**

Andre J. Burnham, Fiona McLaughlin, P. Alexander Burnham and Herman K. Lehman

694

**Changes in cold tolerance during the overwintering period in *Apis mellifera ligustica***

Ming Qin, Hongfang Wang, Zhenguo Liu, Ying Wang, Weixing Zhang, and Baohua Xu

702

**Wild bumble bees (Hymenoptera: Apidae: Bombini) as a potential reservoir for bee pathogens in northeastern Argentina**

María E. Bravi, Leopoldo J. Alvarez, Mariano Lucia, Marcelo R. I. Pecoraro, María L. Genchi García, and Francisco J. Reynaldi

710

**Melliferous potential of *Mentha aquatica***

Chloé De Laet, Tomasz K. Olszewski, and Claude Grison

714

### Toxicology

**Comparative pesticide exposure to *Apis mellifera* via honey bee-collected pollen in agricultural and non-agricultural areas of Northern Thailand**

Veeranan Chaimanee, Panuwan Chantawannakul, Kitiphong Khongphinitbunjong, Torlarp Kamyao, and Jeffery S. Pettis

720

**Immune gene expression in developing honey bees (*Apis mellifera* L.) simultaneously exposed to imidacloprid and *Varroa destructor* in laboratory conditions**

Tanja Tesovnik, Minja Zorc, Aleš Gregorc, Timothy Rinehart, John Adamczyk, and Mojca Narat

730

<b>Effects of clothianidin on antioxidant enzyme activities and malondialdehyde level in honey bee drone semen</b>	
Faten Ben Abdelkader, Guillaume Kairo, Marc Bonnet, Naima Barbouche, Luc P Belzunces, and Jean Luc Brunet	740
<b>Pathology and parasitology</b>	
<b>Rapid detection of Israeli acute paralysis virus using multi-point ultra-rapid real-time PCR (UR-qPCR)</b>	
A.-Tai Truong, Byounghee Kim, Somin Kim, Moonjung Kim, Jungmin Kim, Seonmi Kim, and Byoungsu Yoon	746
<b>Black queen cell virus and drifting of honey bee workers (<i>Apis mellifera</i>)</b>	
Gina Retschnig, Liv A. Kellermann, Marion M. Mehmman, Orlando Yañez, Pius Winiger, Geoffrey R. Williams, and Peter Neumann	754
<b>Hive product science</b>	
<b>Antibacterial activity of honeys produced in Mount Olympus area against nosocomial and foodborne pathogens is mainly attributed to hydrogen peroxide and proteinaceous compounds</b>	
Eleni Tsavea and Dimitris Mossialos	756
<b>First study on the effect of Asiatic honey bee (<i>Apis cerana</i>) venom on cutaneous, hepatic and renal rat tissues</b>	
Prapaporn Uthawarapong, Mark Eric Benbow, and Guntima Suwannapong	764
<b>Polyhenolic profile of floral honeys in correlation with their pollen spectrum</b>	
María Cristina Ciappini	772
<b>Impact of sterilization process on chemical composition and antimicrobial activity of propolis</b>	
Aslı Özkırım, Billur Küçüközmen, and Ömür Gençay Çelemlı	780
<b>Effects of the North Atlantic Oscillation (NAO) and meteorological variables on the annual Alcarria honey production in Spain</b>	
José Carlos Báez, A. Enrique Salvo, Carlos García-Soto, Raimundo Real, Ana Luz Márquez, and Antonio Flores-Moya	788
<b>Comparison of qualitative characteristics of propolis extracts using different purification methods</b>	
Dimitra Graikini, Alexandros Papachristoforou, and Ioannis Mourtzinis	792
<b>Bee management</b>	
<b>The impacts of two protein supplements on commercial honey bee (<i>Apis mellifera</i> L.) colonies</b>	
Marianne Lamontagne-Drolet, Olivier Samson-Robert, Pierre Giovenazzo, and Valérie Fournier	800
<b>A future resistance breeding strategy against <i>Varroa destructor</i> in a small population of the dark honey bee</b>	
Matthieu Guichard, Markus Neuditschko, Padruot Fried, Gabriele Soland, and Benjamin Dainat	814
<b>Acaricide efficacy and honey bee toxicity of three new formic acid-based products to control <i>Varroa destructor</i></b>	
Marco Pietropaoli and Giovanni Formato	824
