

CONTENTS

<i>A. Ruengdech, U. Siripatrawan, A. Sangnark, S. Benedetti and S. Buratti</i> Rapid evaluation of phenolic compounds and antioxidant activity of mulberry leaf tea during storage using electronic tongue coupled with chemometrics	563
<i>T. Piechowiak and M. Balawejder</i> Impact of ozonation process on the antioxidant status in blackcurrant <i>Ribes nigrum</i> L. fruit	575
<i>J. López, A. Vega-Gálvez, A. Rodríguez, K. Stucken, C. Barraza and L.E. Aguilera</i> Relationship between antimicrobial activity, phenolic profile and antioxidant capacity of murta (<i>Ugni molinae</i> Turcz) extracts prepared by different drying methods	587
<i>X. Wu, J. Sun, J. Ahuja, D.B. Haytowitz, P. Chen, B. Burton-Freeman and P.R. Pehrsson</i> Anthocyanins in processed red raspberries on the US market	603
<i>A. Assirelli, F. Stagno, A. Cocchi, S. Sirri, A. Saviane, D. Giovannini and S. Cappellozza</i> Innovative system for mulberry fruit harvesting	615
<i>L.S. McAnulty, S.R. Collier, J. Pike, K.L. Thompson and S.R. McAnulty</i> Time course of blueberry ingestion on measures of arterial stiffness and blood pressure	631
<i>J. Benny, A. Perrone, F.P. Marra, A. Pisciotta, T. Caruso and F. Martinelli</i> Deciphering transcriptional regulation mechanisms underlining fruit development and ripening in <i>Vitis vinifera</i>	641
<i>E. Alarcón-Poblete, C. Inostroza-Blancheteau, M. Latsague, M. Alberdi, F.M. de Oliveira Silva, A. Nunes-Nesi, P. Poblete-Grant, C. Meriño-Gergichevich and M. Reyes-Díaz</i> Gypsum application ameliorates morphological and photochemical damages provoked by Al toxicity in <i>Vaccinium corymbosum</i> L. cultivars	665
<i>N.K. Huynh, M.D. Wilson, A. Eyles and R.A. Stanley</i> Recent advances in postharvest technologies to extend the shelf life of blueberries (<i>Vaccinium</i> sp.), raspberries (<i>Rubus idaeus</i> L.) and blackberries (<i>Rubus</i> sp.)	687
<i>L. Zoubiri, S. Bakir, M. Barkat, C. Carrillo and E. Capanoglu</i> Changes in the phenolic profile, antioxidant capacity and <i>in vitro</i> bioaccessibility of two Algerian grape varieties, Cardinal and Dabouki (Sabel), during the production of traditional sun-dried raisins and homemade jam	709
