

EDITORIAL

- 1 **Rescuing Paris**

CORRESPONDENCE

- 2 **Waves do not contribute to global sea-level rise**
Jerome Aucan et al.
- 3 **Reply to 'Waves do not contribute to global sea-level rise'**
Angélique Melet, Benoît Meyssignac, Rafaël Almar and Gonéri Le Cozannet

Q&A

- 4 **International perspectives**
Jenn Richler

RESEARCH HIGHLIGHTS

- 7 **Our choice from the recent literature**

NEWS & VIEWS

- 8 **Consumer perceptions: From myths to action**
Michael P. Vandenberg and Kristian Steensen Nielsen
- 9 **Hydroclimate: A unified wetting and drying theory**
Jacob Scheff

PERSPECTIVES

- 11 **A research roadmap for quantifying non-state and subnational climate mitigation action**
Angel Hsu et al.
- 18 **The private sector's climate change risk and adaptation blind spots**
Allie Goldstein, Will R. Turner, Jillian Gladstone and David G. Hole
- 26 **Madden-Julian oscillation changes under anthropogenic warming**
Eric D. Maloney, Ángel F. Adames and Hien X. Bui

LETTERS

- 34 **Increased snowfall over the Antarctic Ice Sheet mitigated twentieth-century sea-level rise**
B. Medley and E. R. Thomas
- 40 **Ecological memory modifies the cumulative impact of recurrent climate extremes**
Terry P. Hughes et al.

- 44 **Hydrologic implications of vegetation response to elevated CO₂ in climate projections**
Yuting Yang, Michael L. Roderick, Shulei Zhang, Tim R. McVicar and Randall J. Donohue
→N&V p9
- 49 **Boreal forest biomass accumulation is not increased by two decades of soil warming**
Hyungwoo Lim et al.

ARTICLES

- 53 **Consumers underestimate the emissions associated with food but are aided by labels**
Adrian R. Camilleri, Richard P. Larrick, Shajuti Hossain and Dalia Patino-Echeverri
→N&V p8
- 59 **Natural variability of Southern Ocean convection as a driver of observed climate trends**
Liping Zhang, Thomas L. Delworth, William Cooke and Xiaosong Yang
- 66 **Agricultural non-CO₂ emission reduction potential in the context of the 1.5 °C target**
Stefan Frank et al.
- 73 **Global trends in carbon sinks and their relationships with CO₂ and temperature**
M. Fernández-Martínez et al.

AMENDMENTS

- 80 **Publisher Correction: Bitcoin emissions alone could push global warming above 2 °C**
Camilo Mora et al.
