FORUM PAPER

Unravelling the status of partially identified insect biological control agents introduced to control insects: an analysis of BIOCAT2010

M.J.W. Cock 1

ORIGINAL PAPERS

Augmentative releases of *Trichopria drosophilae* for the suppression of early season *Drosophila suzukii* populations

M.V. Rossi Stacconi · A. Grassi · C. Ioriatti · G. Anfora 9

Leucopis glyphinivora*, a potential aphidophagous biocontrol agent? Predation and comparison with the commercial agent *Aphidoletes aphidimyza
S. Barriault · M. Fournier · A.O. Soares · E. Lucas 21

Pre-planting inoculation for early establishment of *Dicyphus bolivari* and *D. errans* on tomatoes

F. Madeira · E. Edo · S. Sossai · J. Callizo · R. Albajes 33

Adequacy of *Drosophila melanogaster* as prey for the development and reproduction of *Coleomegilla maculata*

H. Schultz · E. da Silva · E. de Lima Aguiar-Menezes · A.L. Santos Resende · J. Ribeiro Costa Rouws · A.R. Moreira da Silva 43

Intraguild predation between *Harmonia axyridis* and *Aphidius gifuensis*: effects of starvation period, plant dimension and extraguild prey density

X.-L. Yu · Y. Feng · W.-Y. Fu · Y.-X. Sun · T.-X. Liu 55

Moisturized sheltered sachets are potentially useful for the efficient release of selected predators in a wide range of humidity environments

T. Shimoda · Y. Kagawa · H. Yoshizawa · A. Nakano · K. Matsuhira · H. Yanagita · M. Shimomoto · T. Adachi-Hagimori · K. Mori · N. Hinomoto · T. Hiraoka · T. Nakajima 65

Control of powdery mildew (*Leveillula taurica*) using *Trichoderma asperellum* and *Metarhizium anisopliae* in different pepper types

C. Guigón López · L.N. Muñoz Castellanos · N.A. Flores Ortiz · J.A. González González 77

Folivory impact of the biocontrol beetle, *Cassida rubiginosa*, on population growth of *Cirsium arvense*

M.G. Cripps · S.D. Jackman · C. van Koten 91

With or without you: stem-galling of a tephritid fly reduces the vegetative and reproductive performance of the invasive plant *Chromolaena odorata* (Asteraceae) both alone and in combination with another agent

P.O. Aigbedion-Atalor · M.D. Day · I. Idemudia · D.D. Wilson · I.D. Paterson 103
