

The pros and cons of using biocontrol by competitive exclusion as a means for reducing aflatoxin in maize in Africa	103
<i>J.I. Pitt</i>	
Machine learning algorithms for the automated classification of contaminated maize at regulatory limits via infrared attenuated total reflection spectroscopy	113
<i>T. Öner, P. Thiam, G. Kos, R. Krska, F. Schwenker and B. Mizaikoff</i>	
Contamination of sesame seed grown in Mississippi with aflatoxin, fumonisin, and mycotoxin-producing fungi	123
<i>H.K. Abbas, M. Wayne Ebelhar, N. Bellaloui, M.J. Mulvaney, G.R.D. Stoner, J.K. Kotowicz, N.S. Little, C. Accinelli and W.T. Shier</i>	
The influence of milling and sifting processes on deoxynivalenol distribution in whole-wheat flour and its products	133
<i>Y. Kochiieru, A. Mankeviciene, S. Janaviciene, A. Jonaviciene and J. Ceseviciene</i>	
Meta-effect of insect resistant maize on fumonisin B₁ in grain estimated by variance-weighted and replication-weighted analyses	141
<i>K.M. Cappelle, G.P. Munkvold and J.D. Wolt</i>	
<i>Gluconobacter oxydans</i> – potential biological agent for binding or biotransformation of mycotoxins	153
<i>K. Markov, J. Frece, J. Pleadin, M. Bevardi, L. Barišić, J. Gajdoš Kljusurić, A. Vulić, Ž. Jakopović and J. Mrvčić</i>	
DNA damage in rat kidneys and liver upon subchronic exposure to single and combined ochratoxin A and citrinin	163
<i>D. Rašić, D. Želježić, N. Kopjar, D. Kifer, M. Šegvić Klarić and M. Peraica</i>	
Bioaccessibility in daily diet and bioavailability <i>in vitro</i> of aflatoxins from maize after cooking	173
<i>X. Lin, X. Hu, Y. Zhang, Y. Xia and M. Zhang</i>	
Impact of climatic conditions on fumonisins in maize grown in Serbia	183
<i>B. Udovicki, I. Djekic, S. Stankovic, A. Obradovic and A. Rajkovic</i>	
Risk associated with the intake of aflatoxin M₁ from milk in Iran	191
<i>A. Fooladi Moghaddam, M. Rychlik, H. Hosseini, B. Janat, H. Yazdanpanah and M.H. Shojaee AliAbadi</i>	
World Mycotoxin Agenda	201
