- Nature conservation on decommissioned military training areas – German approaches and experiences**
Götz Ellwanger and Karin Reiter
- Keeping reptiles as pets in Brazil: Ethnozoological and conservation aspects**
Rômulo Romeu Nóbrega Alves,
Bruna Monielly Carvalho de Araújo,
Iamara da Silva Policarpo, Heliene Mota Pereira,
Anna Karolina Martins Borges,
Washington Luiz da Silva Vieira and
Alexandre Vasconcellos
- Unsafe management of a zoological garden as a cause of introduction of an alien species into the wild: First documented case of feral naturalized population of *Lama glama* in Europe**
Giuseppe Dodaro, Corrado Battisti,
Tommaso Campedelli, Giuliano Fanelli and
Andrea Monaco
- Ecosystem intrinsic value and its application in decision-making for sustainable development**
Hua-Xia Sheng, Hongni Xu, Luoping Zhang and
Weiqi Chen
- Incorporating landscape heterogeneity into multi-objective spatial planning improves biodiversity conservation of semi-natural grasslands**
Annika Harlio, Mikko Kuussaari, Risto K. Heikkinen
and Anni Arponen
- State of conservation index for high Andean wetlands**
Gloria Yaneth Flórez Yepes and
Jhon Fredy Betancur Pérez
- Using a goal programming approach to design and evaluate protected areas for the conservation of multiple dimensions of biodiversity**
Jennifer Morales-Barbero and Dolores Ferrer-Castán
- Relationships between valence towards wildlife and wildlife value orientations**
Zulkhairi Azizi Zainal Abidin and Maarten Jacobs 63
- Foraging theory provides a useful framework for livestock predation management**
Peter M. Haswell, Elizabeth A. Shepherd,
Suzanne A. Stone, Brad Purcell and Matt W. Hayward 69
- Modeling carbon dioxide for show cave conservation**
E. Guirado, D. Ramos-López, A.D. Maldonado,
J.J. Moreno-Balcázar and J.M. Calaforra 76
- Species distribution models support the need of international cooperation towards successful management of plant invasions**
Rui F. Fernandes, João P. Honrado, Antoine Guisan,
Alice Roxo, Paulo Alves, João Martins and
Joana R. Vicente 85
- Seventy-year chronology of Salinas in southern France: Coastal surfaces managed for salt production and conservation issues for abandoned sites**
Rutger De Wit, Alice Vincent, Ludovic Foulc,
Mario Kleszczewski, Olivier Scher, Claudine Lose,
Marc Thibault, Brigitte Poulin, Lisa Ernoul and
Olivier Boutron 95
- Non-intrusive systematic study reveals mutualistic interactions between threatened island endemic species and points to more impactful conservation**
Prishnee Bissessur, Yogishah Bunsy, Cláudia Baidier
and François Benjamin Vincent Florens 108
- Climate change and opposing spatial conservation priorities for anuran protection in the Brazilian hotspots**
Tiago S. Vasconcelos and Vitor H.M. Prado 118
