

## CONTENTS

Volume 31 Number 1 2019

### Articles

- Effects of solids removal on water quality and channel catfish production in a biofloc technology production system  
*Bartholomew W. Green, Kevin K. Schrader, and Matthew McEntire* 1
- Quantitative genetics of disease resistance in different groups of *Penaeus semisulcatus* from preliminary controlled challenge test with *Vibrio parahaemolyticus* the aetiological agent of acute hepatopancreatic necrosis disease (AHPND)  
*Mohamed E. Megahed* 17
- Physiological response of temperature shocks in turbot and sole  
*Atle Foss, Albert Kjartan Dagbjartarson Imsland, Hans van de Vis, Wout Abbink, Bert Lambooij, and Bjørn Roth* 34
- Utilization of a by-product from the *Jatropha* biodiesel industry as a fish meal replacer in common carp *Cyprinus carpio* L. diets  
*Vikas Kumar, Harinder P. S. Makkar, Nicholas Romano, and Klaus Becker* 48
- Effects of levamisole, echinacea, and thyme oral administration on growth factors, blood parameters, and immunity in beluga, *Huso huso*  
*Mahboubeh Eslami and Masoumeh Bahrekazemi* 68
- Note**
- Effect of different concentrations of potassium and magnesium on performance of *Litopenaeus vannamei* postlarvae reared in low-salinity water and a biofloc system  
*Simão Zacarias, Rodrigo Schweitzer, Rafael Arantes, Helena Galasso, Isabela Pinheiro, Carlos Espirito Santo, and Luis Vinatea* 85
