

CONTENTS

Articles

UPADHAYA, A., YAN, G., PASCHE, J. & KALIL, A.— Occurrence and distribution of vermiform plant-parasitic nematodes and the relationship with soil factors in field pea (<i>Pisum sativum</i>) in North Dakota, USA	445-457
GOULART, R.R., TERRA, W.C., SALGADO, S.M.L., ALVES, J.D., CAMPOS, V.P., FATOBENE, B.J.R., MARCHIORI, P.E.R., DE SOUZA, S.R. & OLIVEIRA, R.D.L.— <i>Meloidogyne paranaensis</i> and <i>M. exigua</i> alter coffee physiology	459-467
PHANI, V., SOMVANSHI, V.S., RAO, U. & KHAN, M.R.— <i>Paratylenchus jasmineae</i> sp. n. (Nematoda: Paratylenchinae) from rhizosphere of <i>Jasminum sambac</i> in India	469-478
ANDRUS, P. & RAE, R.— Natural variation in chemoattraction in the gastropod parasitic nematodes <i>Phasmarhabditis hermaphrodita</i> , <i>P. neopapillosa</i> and <i>P. californica</i> exposed to slug mucus	479-488
MURATA, G., TAKAI, T. & UESUGI, K.— A fodder sorghum cultivar, 'Kyushuko 3 go', suppresses root-knot nematode, <i>Meloidogyne incognita</i>	489-496
ZENG, Y., HUANG, J., ZHANG, D., ZENG, W., SHI, R., ZHANG, Y., PENG, Y., YE, W. & GIBLIN-DAVIS, R.M.— <i>Ficophagus auriculatae</i> n. sp. (Nematoda: Aphelenchoididae), an associate of the <i>Ficus auriculata</i> -complex in China	497-508
HOANG, H., CHU, H.H., NGUYEN, T.A.D., TRINH, Q.P., ABOLAFIA, J. & PEÑA-SANTIAGO, R.— Morphological and molecular characterisation of <i>Chitwoodius coffeae</i> sp. n. (Dorylaimida: Tylencholaimidae) from Vietnam, with a revised taxonomy of the genus	509-521
ELHADY, A., THÜNEN, T., HÖPPNER, F., BALKO, C., HEUER, H. & HALLMANN, J.— Evaluation of soybean cultivars for their susceptibility to root-lesion nematodes under temperate conditions	523-531
HOWE, D.K., SMITH, M., TOM, D.M., BROWN, A.M.V., PEETZ, A.B., ZASADA, I.A. & DENVER, D.R.— Analysis of nematode-endosymbiont coevolution in the <i>Xiphinema americanum</i> species complex using molecular markers of variable evolutionary rates	533-546
CHENG, Z., TOYOTA, K. & AOYAMA, R.— Relationship among the potato rot nematode, <i>Ditylenchus destructor</i> , densities in soil, root and garlic (<i>Allium sativum</i>) bulbs, and rot damage in stored garlic bulbs	547-555
