

## **EDITORIAL**

- 341 **Future thinking**

## **CORRESPONDENCE**

- 342 **Foresight must guide geoengineering research and development**  
Andrew Lenton, Philip W. Boyd, Marcus Thatcher and Kathryn M. Emerson

## **COMMENT**

- 343 **The future is collaborative**  
G. Cundill, B. Currie-Alder and M. Leone
- 345 **Model-based assessments for long-term climate strategies**  
Matthias Weitzel et al.

## **BOOKS & ARTS**

- 348 **Fundamentals point to carbon capture**  
Hannah Chalmers

## **FEATURE**

- 349 **Looking past the horizon of 2100**  
Sonja van Rensen.

## **RESEARCH HIGHLIGHTS**

- 352 **Our choice from the recent literature**

## **NEWS & VIEWS**

- 353 **Public perceptions: Feeling the heat is not enough**  
Peter D. Howe
- 354 **Climate dynamics: Oscillating American winter temperatures**  
Stephen Baxter
- 355 **Forest ecology: The fate of Amazonia**  
Emanuel Gloor
- 357 **Snapshot: Experimenting with multistressors**  
Bronwyn Wake

## **REVIEW ARTICLE**

- 358 **Contributions of GRACE to understanding climate change**  
Byron D. Tapley et al.

## LETTERS

- 370 **The UK summer heatwave of 2018 and public concern over energy security**  
Shaun Larcom, Po-Wen She and Terry van Gevelt  
→N&V p353
- 374 **Strategies to reduce the global carbon footprint of plastics**  
Jiajia Zheng and Sangwon Suh
- 379 **Unchanged frequency of moraine-dammed glacial lake outburst floods in the Himalaya**  
Georg Veh et al.
- 384 **Amazonian rainforest tree mortality driven by climate and functional traits**  
Izabela Aleixo et al.  
→N&V p355

## ARTICLES

- 389 **Asserting the climate benefits of the coal-to-gas shift across temporal and spatial scales**  
Katsumasa Tanaka, Otávio Cavalett, William J. Collins and Francesco Cherubini
- 397 **Climate damages and adaptation potential across diverse sectors of the United States**  
Jeremy Martinich and Allison Crimmins
- 405 **Reconciling opposing Walker circulation trends in observations and model projections**  
Eui-Seok Chung et al.
- 413 **Tropical influence on the North Pacific Oscillation drives winter extremes in North America**  
Mi-Kyung Sung et al.  
→N&V p354
- 419 **Advances in phenology are conserved across scale in present and future climates**  
David N. Laskin et al.
