

# European Journal of Horticultural Science

- Opportunities and challenges in fruit tree and orchard modelling  
T.M. DeJong > 117
- Fruit size and yield efficiency of 'Gala' apples grown in Chile depend on winter temperatures and season length  
G. Reginato K. Mesa C. Riquelme > 124
- Chemical contents and blue mould susceptibility in Swedish-grown cider apple cultivars  
T. Spoor K. Rumpunen J. Sehic A. Ekholm I. Tahir H. Nybom > 131
- Application of alkylresorcinols in an organic apple orchard for protection against storage diseases  
I. Tahir E.S. Dey H. Nybom > 142
- Use of cyclic voltammetry to determine the antioxidant capacity of berry fruits: correlation with spectrophotometric assays  
M.D. Nikolić A.N. Pavlović S.S. Mitić S.B. Tošić M.N. Mitić B.M. Kaličanin D.D. Manojlović D.M. Stanković > 152
- Possible involvement of flavonoids in response of mulberry (*Morus alba* L.) to infection with *Ralstonia solanacearum* (Smith 1896) Yabuuchi *et al.*, 1996  
Fanwei Dai Guoqing Luo Zhenjiang Wang Zheshi Kuang Zhiyi Li Jing Huang Cuiming Tang > 161
- Foliar application of kaolin reduces the incidence of sunburn in 'Thompson Seedless' grapevine  
A. Hosseinabad A. Khadivi > 171
- Recurrent deficit irrigation and fruit harvest affect tree water relations and fruitlet growth in 'Valencia' orange  
F.S. Grilo A. Scalisi F. Pernice B. Morandi R. Lo Bianco > 177
