

PLANT, SOIL AND ENVIRONMENT

Volume 65, No. 4

April 2019

CONTENTS

- Gelaye K.K., Zehetner F., Loiskandl W., Klik A.:
Comparison of growth of annual crops used for salinity bioremediation
in the semi-arid irrigation area 165
- Sądej W., Żołnowski A.C.:
Comparison of the effect of various long-term fertilization systems on the content
and fractional composition of humic compounds in Lessive soil 172
- Hamanaka A., Sasaoka T., Shimada H., Matsumoto S.:
Experimental study on soil erosion under different soil composition using rainfall simulator 181
- Yuan Y., Dai X.Q., Wang H.M.:
Fertilization effects on CH₄, N₂O and CO₂ fluxes from a subtropical double rice cropping system 189
- Jiang C.M., Yu W.T.:
Maize production and field CO₂ emission under different straw return rates
in Northeast China 198
- Křen J., Houšť M., Tvarůžek L., Jergl Z.:
The effect of stand structure on the grain quality of spring barley 205
- Tabak M., Lepiarczyk A., Filipek-Mazur B., Bachara P.:
The effect of fertilization with ammonium nitrate enriched with ammonium sulfate
on the quantity and quality of winter wheat grain yield as well as on soil properties 211
- Wang L., Meng Y., Chen G.Q., Liu X.Y., Wang L., Chen Y.H.:
Impact of maize growth on N₂O emission from farmland soil 218
