

Agricultural Research

VOLUME 62 NUMBER 4 DECEMBER 2019

Review article

Triplet lambs and their dams – a review of current knowledge and management systems

P. R. Kenyon, F. J. Roca Fraga, S. Blumer and A. N. Thompson 399

Research articles

Predicting nitrogen supply from dairy effluent applied to contrasting soil types

M. Norris, P. R. Johnstone, M. M. Dexter, D. R. Selbie, D. J. Houlbrooke, J. M. Sharp and D. I. Hedderley 438

The impact of nutrient regulations on dairy farm land values in Southland

C. F. Muller and M. B. Neal 457

Biomass, feed quality, mineral concentration and grain yield responses to potassium fertiliser of dual-purpose crops

J. E. Holland, R. C. Hayes, G. Refshauge, G. J. Poile, M. T. Newell and M. K. Conyers 476

Variation in cadmium concentrations in shoots of chicory (*Cichorium intybus* L.)

J. R. Crush, L. Ouyang and G. R. Cousins 495

A comparison of temperate pasture species mixtures selected to increase dairy cow production and reduce urinary nitrogen excretion

M. Dodd, D. Dalley, C. Wims, D. Elliott and A. Griffin 504

Prediction of coumestrol content in unirrigated lucerne crops using weather variables

R. L. Fields, J. R. Sedcole, G. K. Barrell and D. J. Moot 528
