

Contents

- 85 **Optimisation of crystal violet removal onto raw kaolin using response surface methodology**
Natiela Caponi, Gabriela Carvalho Collazzo, Julia da Silveira Salla, Sérgio Luiz Jahn, Guilherme Luiz Dotto and Edson Luiz Foletto
- 101 **Numerical simulation of pollutant dispersion in an urban street canyon – effects of elevated metro rail track**
Abhishek Pratap Singh and Pramod Bhatia
- 115 **Identification of the malodour source in a complex office environment using solid-phase microextraction and gas chromatography**
Olga Trhlíková
- 128 **Degradation of thiophanate-methyl fungicide by photo-Fenton process using lab-scale annular and solar tubular reactors**
Talitha de Andrade Borges, Osvaldo Chiavone-Filho, Antônio Carlos Silva Costa Teixeira, Edson Luiz Foletto, Guilherme Luiz Dotto and Cláudio Augusto Oller do Nascimento
- 138 **Removal of 2,4-dichlorophenol in a micro-packed bed adsorber by activated carbon from *Coffea arabica* fruit endocarp**
Maria L. Correa, Daniel I. Arango, Jorge H. Sánchez, Germán C. Quintana and Jorge A. Velásquez
- 155 **Desilication of calcined pulverised fly ash and use of silicate solution to prepare a mesoporous silica adsorbent for heavy metals in acid mine drainage**
Thabo Falayi, Freeman Ntuli and Felix Ndubisi Okonta
- 177 **Forecasting air pollution rates in industrial centres: a case study for Kocaeli-Turkey**
Aliye Atay, Yılmaz Akdi, Yasin Okkaoglu and Faruk Çelikkanat
- 189 **The effect of internationalisation and regulation on environmental efficiency: an empirical analysis of Spanish companies**
Juan A. Román-Aso and Jaime Vallés-Giménez
- 207 **Evaluating the effects of elevated concentrations of urea, phosphogypsum and paper mill sludge on soil chemical, microbial and exoenzyme dynamics**
Suryasikha Samal, C.S.K. Mishra and Sunanda Sahoo
