

## **Contents**

---

- 209     **Discharge prediction in meandering compound channels**  
*Arpan Pradhan and Kishanjit K. Khatua*
- 221     **An urban flood inundation model based on cellular automata**  
*Saman Armal and Rafea Al-Suhili*
- 236     **Proposing the minimum and maximum probable water quality indices for better water quality management in poor and underdeveloped countries (case study: Bilghan intake)**  
*Ali Dehnavi and Pardis Goudarzian*
- 248     **Development of prediction model for forecasting rainfall in Western Australia using lagged climate indices**  
*Farhana Islam and Monzur A. Imteaz*
- 269     **Geochemical assessment of groundwater quality: a case study from Adamawa in Northeastern Nigeria**  
*A.B. Seli, B.A. Ankidawa, J.M. Ishaku and M.D. Aminu*
- 293     **The long-term trend analysis of rainfall data from 1901 to 2015 for Maharashtra and Goa region from India**  
*Swapnil S. Potdar, Shreyas Kulkarni, Priyanka Patil, Rani P. Pawar, V.V. Jakhalekar and Dada Pandurang Nade*
