**The intestine-responsive lysozyme nanoparticles-in-oxidized starch microgels with mucoadhesive and penetrating properties for improved epithelium absorption of quercetin**

Dan Li, Ailian Liu, Meiyu Liu, Xin Li, Huiyuan Guo, Congcong Zuo, Yuan Li

In intestine, the composite system transferred from mucoadhesive system to mucus penetrating system. ①Que/LNP/OSM was adhered to mucus for sustained release; ②Que/LNP/OSM responded to the neutral and enzymatic intestinal conditions and released Que/LNP; ③The released Que/LNP penetrated through the mucus layer quickly for further absorption by the epithelial cells.
