PERSPECTIVE

Response to 'The predominantly fresh history of Lake Alexandrina, South Australia, and its implications for the Murray–Darling Basin Plan: a comment on Gell (2020)'

T. Hubble, A. Helfensdorfer and H. Power

215

RESEARCH PAPERS

Conservation in the wake of myrtle rust – a case study on two critically endangered Australian rainforest plants

K. D. Sommerville, P. Cuneo, G. Errington, R. O. Makinson, S. Pederson, G. Phillips, A. Rollason, V. Viler and C. A. Offord

218

Population decline of the noisy scrub-bird is not correlated with territory size, marginal declines in rainfall or fire impacts

J. D. Roberts, A. Danks, A. Berryman, N. Sidhu, A. H. Burbidge and S. Comer

230

A comparison of urban and peri-urban/hinterland nocturnal birds at Brisbane, Australia

G. R. Fulton, G. R. Fulton and Y. W. Cheung

239

An artificial site provides valuable additional habitat to migratory shorebirds in a tropical harbour

A. Lilleyman, D. I. Rogers, M. V. Jackson, R. A. Fuller, G. O'Brien and S. T. Garnett

249

Breeding habitat, nest-site characteristics and productivity of the little eagle (*Hieraetus morphnoides*) near Armidale, New South Wales

C. Larkin, R. Jenkins, P. G. McDonald and S. J. S. Debus

258

A case study of environmental offsets for the endangered Carnaby's cockatoo (*Calyptorhynchus latirostris*)

B. Richards, M. Sullivan and P. R. Mawson

269

Genetic viability of a reintroduced population of south-western common brushtail possum (*Trichosurus vulpecula hypoleucus*), Western Australia

L. Semple, K. Ottewell, C. Sims, H. Simianer and M. Byrne

282

High prevalence of non-native fish species in a remote region of the Mamberamo River, Indonesia

A. Wibowo, D. Atminarso, L. Baumgartner and A. Vasemagi

293

Descriptions of spawning of the pouched lamprey (*Geotria australis*) in tanks and of morphological changes leading up to and following spawning

K. R. Paton, M. H. Cake, D. J. Bird and I. C. Potter

301

FIELD NOTE

Not yet extinct: *Rhynchobatus cooki* is found after being unseen for over 20 years

N. Clark-Shen, B. Venkatesh, C. Choy Pei Pei, K. Xu and G. J. P. Naylor
