

Volume 85 Issue 5  
October 2020

Sustainable use of resources in plant factories with artificial lighting (PFALs) <i>Thematic Issue</i> F. Orsini G. Pennisi F. Zulfiqar G. Gianquinto	297
Comparison of energy use efficiency of greenhouse and indoor plant factory system <i>Thematic Issue</i> Ying Zhang M. Kacira	310
Urban farming in indoor settings: Nitrate limits compliance check of leafy green vegetables under LED lighting <i>Thematic Issue</i> M. Gräf R. Stangl R. Hood-Nowotny A. Kodym	321
Optimal photoperiod for indoor cultivation of leafy vegetables and herbs <i>Thematic Issue</i> G. Pennisi F. Orsini M. Landolfo A. Pistillo A. Crepaldi S. Nicola J.A. Fernández L.F.M. Marcelis G. Gianquinto	329
Spectral manipulations to elicit desired quality attributes of herbaceous specialty crop <i>Thematic Issue</i> N. Kelly E.S. Runkle	339
Where is the business? A study into prominent items of the Vertical Farm Business Framework <i>Thematic Issue</i> S. Allegaert E.F.M. Wubben G. Hagelaar	344
Relation between relative growth rate and tipburn occurrence of romaine lettuce under different light regulations in a plant factory with LED lighting Wenshuo Xu D.T.P. Nguyen Shunsuke Sakaguchi Takuji Akiyama Satoru Tsukagoshi A. Feldman Na Lu	354
Evaluation of the dual source model to simulate transpiration and evaporation of tomato plants cultivated in a solar greenhouse X.W. Gong J.K. Ge Y.B. Li S.S. Wang H. Zhang L. Zhang Y.F. Liu H. Liu	362
Substrates for the production of lettuce seedlings A.M. Zuffo J. González Aguilera R.E. Lima C. Zaratin Alves	372
