

CONTENTS

Research Articles

- Cellar Temperature Affects *Brettanomyces bruxellensis* Population and Volatile Phenols Production in Aging Bordeaux Wines
A. Cibrario, C. Miot Sertier, L. Riquier, G. de Revel, I. Masneuf-Pomarède, P. Ballestra, and M. Dols-Lafargue 1 - 9
- Automatic Flower Number Evaluation in Grapevine Inflorescences Using RGB Images
J. Tello, K. Herzog, F. Rist, P. This, and A. Doligez 10 - 16
- Press Fractioning of Grape Juice: A First Step to Manage Potential Atypical Aging Development during Winemaking
T. Roman, T. Nardin, G. Trenti, C. Barnaba, G. Nicolini, and R. Larcher 17 - 25
- Nonlinear Behavior of Protein and Tannin in Wine Produced by Cofermentation of an Interspecific Hybrid (*Vitis* spp.) and *vinifera* Cultivar
E.L. Norton, G.L. Sacks, and J.N. Talbert 26 - 32
- Potassium Requirements for Pinot noir Grapevines
R.P. Schreiner and J. Osborne 33 - 43
- Predicting the Impact of Fermentor Geometry and Cap Management on Phenolic Profile Using a Reactor Engineering Model
K.V. Miller, A. Oberholster, and D.E. Block 44 - 51
- Soil Temperature Prior to Veraison Alters Grapevine Carbon Partitioning, Xylem Sap Hormones, and Fruit Set
S.K. Field, J.P. Smith, E.N. Morrison, R.J.N. Emery, and B.P. Holzapfel 52 - 61
- Addition Rate of Exogenous Tannin for Optimal Tannin Retention in Hybrid Red Wines
A.J. Fredrickson, D.C. Manns, and A.K. Mansfield 62 - 69

CONTENTS

Early Leaf Removal as a Strategy to Improve Ripening and Lower Cluster Rot in
Cool Climate (*Vitis vinifera* L.) Pinot Grigio
J. VanderWeide, T. Frioni, Z. Ma, M. Stoll, S. Poni, and P. Sabbatini 70 - 79

Research Note

Malate Content in Wild *Vitis* spp. Demonstrates a Range of Behaviors during
Berry Maturation
E.A. Burzynski-Chang, E.J. Brown, N. Reshef, and G.L. Sacks 80 - 87
