

CONTENTS

- Japan Prize Research**
- 1 Managing soils for negative feedback to climate change and positive impact on food and nutritional security
Rattan Lal
- JSSSPN Award Research**
- 10 Research on ways to improve crop productivity through the regulation of rhizosphere environments
Takuro Shinano
- 15 Analysis of problems in certain soils of the Kyushu Okinawa region for suitable management
Hideo Kubotera
- 21 Use of models to evaluate carbon sequestration in agricultural soils
Yasuhito Shirato
- 28 Mechanisms of cadmium accumulation in rice grains and molecular breeding for its reduction
Satoru Ishikawa
- Preface**
- 34 Soil carbon and nitrogen dynamics by land use and management changes in East and Southeast Asian countries (soil C and N by LUMC)
Weiguo Cheng
- Soil C and N by LUMC**
- 37 Potential and promisingness of technical options for mitigating greenhouse gas emissions from rice cultivation in Southeast Asian countries
Kazuyuki Yagi, Patikorn Sriphiom, Nittaya Cha-un, Kanlayanee Fusuwankaya, Amnat Chidthaisong, Beau Damen and Sirintornthep Towprayoon
- 50 Impact of intensive agricultural management on carbon and nitrogen dynamics in the humid tropics
Benito Heru Purwanto and Syamsu Alam
- 60 Land-use management for sustainable rice production and carbon sequestration in reclaimed coastal tideland soils of South Korea: a review
Sang-Sun Lim, Hye In Yang, Hyun-Jin Park, Se-In Park, Bo-Seong Seo, Kwang-Seung Lee, Seung-Heon Lee, Sang-Mo Lee, Han-Yong Kim, Jin-Hee Ryu, Jin-Hyeob Kwak and Woo-Jung Choi
- 76 Do tillage and conversion of grassland to cropland always deplete soil organic carbon?
Ikabongo Mukumbuta and Ryusuke Hatano
- 84 Effect of the long-term application of organic matter on soil carbon accumulation and GHG emissions from a rice paddy field in a cool-temperate region, Japan. -I. Comparison of rice straw and rice straw compost -
Fumiaki Takakai, Yasuhiro Kominami, Satoshi Ohno and Osamu Nagata
- 96 Effect of the long-term application of organic matter on soil carbon accumulation and GHG emissions from a rice paddy field in a cool-temperate region, Japan-II. Effect of different compost applications-
Fumiaki Takakai, Keiko Hatakeyama, Mizuhiko Nishida, Osamu Nagata, Takashi Sato and Yoshihiro Kaneta
- 106 Comparison of paddy soil fertility under conventional rice straw application versus cow dung compost application in mixed crop-livestock systems in a cold temperate region of Japan
Tung Thanh Nguyen, Yuka Sasaki, Ken-ichi Kakuda and Hiroshi Fujii
- 116 Comparison of the nitrogen balance in paddy fields under conventional rice straw application versus cow dung compost application in mixed crop-livestock systems
Tung Thanh Nguyen, Yuka Sasaki, Ken-ichi Kakuda and Hiroshi Fujii
- 125 Stable carbon isotope ratios of water-extractable organic carbon affected by application of rice straw and rice straw compost during a long-term rice experiment in Yamagata, Japan
Toan Nguyen-Sy, Weiguo Cheng, Samuel Munyaka Kimani, Hiroyuki Shiono, Reo Sugawara, Keitaro Tawaraya, Toru Watanabe and Katsumi Kumagai
- 133 Contribution of fallow weed incorporation to nitrogen supplying capacity of paddy soil under organic farming
Kazunobu Toriyama, Taku Amino and Kazuhiko Kobayashi
- 144 Carbon and nitrogen stocks and their mineralization potentials are higher under organic than conventional farming practices in Japanese Andosols
Valensi Kautsar, Weiguo Cheng, Keitaro Tawaraya, Susumu Yamada, Kazunobu Toriyama and Kazuhiko Kobayashi
- 152 Azolla incorporation and dual cropping influences CH₄ and N₂O emissions from flooded paddy ecosystems
Samuel Munyaka Kimani, Putu Oki Bimantara, Satoshi Hattori, Keitaro Tawaraya, Shigeto Sudo and Weiguo Cheng
- 163 Dissolved organic matter and inorganic N jointly regulate greenhouse gases fluxes from forest soils with different moistures during a freeze-thaw period
Haohao Wu, Xu Xingkai, Weiguo Cheng and Han Lin
- 177 Change in soil microbial biomass and regulating factors in an alpine meadow site on the Qinghai-Tibetan Plateau
Jianguo Wu
- 195 Vegetated ridge and sandbag may not reduce soil erosion and loss of carbon and nutrients from upland fields
Se-In Park, Hye In Yang, Hyun-Jin Park, Bo-Seong Seo, Dong-Hwan Lee, Young-Jae Jeong, Kwang-Sik Yoon, Han-Yong Kim and Woo-Jung Choi

- 206 Composition of organic C fractions in soils of different texture affected by sugarcane monoculture
Anna Kusumawati, Eko Hanudin, Benito Heru Purwanto and Makruf Nurudin
- 214 Impact of agricultural land use on physicochemical properties of soils derived from sedimentary rocks in Malaysia
Mum-Keng Wong, Paramanathan Selliah, Tham-Fatt Ng, Meor Hakif Amir Hassan, Eric Van Ranst and Kazuyuki Inubushi
- 225 Variable-timing, fixed-rate application of cattle biogas effluent to rice using a leaf color chart: microcosm experiments in Vietnam
Kazunori Minamikawa, Huynh Cong Khanh, Yasukazu Hosen, Tran Sy Nam and Nguyen Huu Chiem
- 235 Evaluation of biochar applications combined with alternate wetting and drying (AWD) water management in rice field as a methane mitigation option for farmers' adoption
Patikorn Sriphirom, Amnat Chidthaisong, Kazuyuki Yagi, Sudarut Tripetchkul and Sirintornthep Towprayoon
- 247 Long-term fertilizer management in NERICA cultivated upland affects on soil bio-chemical properties
Kazuyuki Inubushi, Miwa Yashima, Shunsuke Hanazawa, Akio Goto, Kisho Miyamoto, Tatsushi Tsuboi and Godfrey Asea
