

New Zealand Journal of Agricultural Research

VOLUME 63 NUMBER 2 JUNE 2020

Research articles

- Nematode parasites are not a major cause of illthrift in adult ewes in New Zealand
D. M. Leathwick, S. Ganesh and C. M. Miller 165
- Determining the ensiling characteristics of potato vine silage supplemented with rice bran and corn and evaluating their ruminal fermentation potential in vitro
Y. Guo, H. Han, R. Luo and F. Zhao 179
- A review of research on the effect of lime on New Zealand soils and pastures
J. D. Morton 189
- Cadmium in New Zealand agricultural soils
E. Abraham 202
- Production benefits from meeting liveweight targets in dairy heifers
N. P. Martín, R. E. Hickson, R. P. de Clifford, W. Tulley, N. Lopez-Villalobos and P. J Back 220
- Can herb-clover mixes compensate for the lack of milk in the diet of early-weaned lambs?
R. A. Corner-Thomas, L. M. Cranston, P. D. Kemp, S. T. Morris and P. R. Kenyon 233
- Data from commercial sheep producers shows that lambing ewes in larger mobs and at higher stocking rates reduces the survival of their lambs
A. L. Lockwood, S. N. Hancock, J. P. Trompf, L. J. Kubeil, M. B. Ferguson, G. A. Kearney and A. N. Thompson 246
- Short communication**
- Short-term grazing and urination behaviour of dairy cows differing in their genetic merit
O. Al-Marashdeh, P. Gregorini, T. M. R. Maxwell, L. Cheng, I. E. Beltrán, A. N. Hussein, A. Chen, L. Guinot, S. Hodge, K. C. Cameron and G. R. Edwards 260
