

Research Articles

- Seasonally dry tropical forests of the Gulf of Mexico: A degraded landscape undergoing homogenization or a promising, resilient reservoir?
N. Mesa-Sierra, J. Laborde and F. Escobar 103583
- Emerging issues in grassland ecology research: Perspectives for advancing grassland studies in Nigeria
S.O. Jimoh, T.O. Muraina, S.K. Bello and N. NourEldeen 103548
- Assessing the role of a mammalian frugivorous species on seed germination potential depends on study design: A case study using wild samango monkeys
S.D. Stringer, R.A. Hill, L. Swanepoel, S.E. Dalrymple, B. Linden and N.F. Koyama 103584
- Quantitative trait variation, phenotypic integration, and plasticity to elevated carbon dioxide in four recombinant inbred populations of *Arabidopsis thaliana* (Brassicaceae)
M. Jonas, A. Adebayo and B. Cioce 103528
- Epiphytic suspended soils from Borneo and Amazonia differ in their microbial community composition
J. Donald, P. Maxfield, C. Leroy and M.D.F. Ellwood 103586
- Vole disturbances and plant community diversity in a productive hay meadow
C. Nicod, G. Couval, P. Giraudoux and F. Gillet 103585
- What determines the seedling viability of different tree species in raccoon dog latrines?
S. Osugi, B.E. Trentin and S. Koike 103604

Short Communication

- Sulphide-toxic habitats are not refuges from parasite infections in an extremophile fish
R. Riesch, N.J. Morley, J. Jourdan, L. Arias-Rodriguez and M. Plath 103602
