Research articles

The milk production and survival of spring-calving carryover cows in New Zealand

R. R. Gardner, N. Lopez-Villalobos, P. J. Back and L. R. McNaughton

479

Spatial variation of soil nutrients in dairy pasture paddocks

W. E. Cotching, L. Taylor and S. R. Corkrey

492

Production and profit of current and future dairy systems using differing nitrogen leaching mitigation methods: the Pastoral 21 experience in Waikato

D. A. Clark, K. A. Macdonald, C. B. Glassey, C. G. Roach, S. L. Woodward, W. M. Griffiths, M. B. Neal and M. A. Shepherd

505

Effects of adding readily available carbon to soil on nitrogen losses from cattle urine patches

W. D. Talbot, K. C. Cameron, H. J. Di, B. J. Malcolm and D. Whitehead

529

Short communication

Earthworm induced transfer of dung-carbon into soil particle size fractions

N. L. Schon, D. Curtin, M. H. Beare, A. D. Mackay, R. A. Gray, M. B. Dodd and C. van Koten
