Yearbook 2020

Contents

Mini-Review: The current role of lactic acid bacteria in beer spoilage

J. Schneiderbanger, F. Jacob and M. Hutzler 1

Use and applications of solar heat in the malting and brewing industry – A review

M. Hauner, K. Eichhorn, S. Veerasilp, S. Thanapornpoonpong and V. Changrue 6

Designing a banana beer recipe

V. Ibarra-Junquera, A. Valencia, V. García-Ibáñez, A. González-Potes, A. Cortés, D. Cesari, L. E. Rodríguez-Serrano, J. J. Ornelas-Paz and P. Escalante-Minakata 18

An exploratory study on the impact of the yeast strain on hop flavour expressions in heavily hopped beers: New England IPA – YEAST-SPECIAL

F. Van Opstaele, G. De Rouck, P. Janssens and G. G. Montandon 26

Preparation of freeze dried and vacuum dried yeast starter cultures: evaluation of relevant viability detection analyses – YEAST-SPECIAL

S. Köhler, M. Schmach, S. Malchow, L. Wolff and M. Senz 41

Genotypic diversity of *Saccharomyces cerevisiae* spoilers in a community of craft microbreweries – YEAST-SPECIAL

M. Latorre, M. Hutzler, M. Michel, M. Zarnkow, F. Jacob and D. Libkind 51

Assessment of chelators in wort and beer model solutions

T. Mertens, T. Kunz and F.-J. Methner 58

A novel dry hopping technology: Kinematic modelling of a planetary rotating bed reactor

C. von Heynitz, M. Stecker, T. Hofmann and K. Glas 68

Upcycling of brewer's yeast – Application as material for encapsulating unstable liquid ingredients in the food industry

M. Eigenfeld, R. Kerpes, J. Bez and T. Becker 77

Kinetic studies of L-ascorbic acid degradation in fruit juices for the improvement of pasteurization plants

L. Katsch, F.-J. Methner and J. Schneider 85

Chemical characterization of the two major hop varieties produced in Patagonia (Argentina) for the brewing industry

A. Trochine, S.B. González, J.A. Burini, L. Cavallini, B. Gastaldi, G. Reiner, F.M. Silva Sofrás, C.M. van Baren, P. Di Leo Lira, D. Retta, A.L. Bandoni and D. Libkind 95

Optimization of alcohol-free beer prepared from fermented wort by *Pichia kluyveri* var *kluyveri*

X. Zhao, T. Liu, Q. Fu, S. Zhang and L. Cheng 103

Industrial wastewater treatment with simultaneous energy recovery using microbial fuel cells – a review

S. Brunschweiger, T. Hofmann and K. Glas 111

Critical aspects of starch in brewing

C.W. Bamforth and G.P. Fox 126

Evaluating a benchtop fermentation method for estimating dextrin degradation by hop diastatic enzymes during dry-hopping – HOP-SPECIAL

A. Stokholm, L. N. Rubottom and T. H. Shellhammer 140

The stability of bitter substances in beer during the ageing process – HOP-SPECIAL

A. Gahr, A. Forster, F. Schüll, S. Faltermaier and F. Kellerer 149
