

CONTENTS

Original Articles

- 683 Influence of warm core eddy on the vertical distribution of autotrophic pico- and nanoplankton in the Bay of Bengal
Arya P. Mohan and Abraham Biju
- 695 Holoplankton and meroplankton of three western Atlantic sedimentary basins
Cristina de Oliveira Dias, Ana Cristina Teixeira Bonecker, Márcia Salustiano de Castro, Pedro Freitas de Carvalho, Rodolfo Paranhos and Sérgio Luiz Costa Bonecker
- 714 Colour polymorphism and genetic structure in the cannonball jellyfish (*Stomolophus meleagris*, L. Agassiz, 1860) in the Gulf of California
Cintya Nevárez-López, Norma Hernández-Saavedra, Arturo Sánchez-Paz, Delia Rojas-Posadas, Adriana Muhlia-Almazán and Juana López-Martínez
- 729 Bacterial composition and putative functions associated with sponges, sediment and seawater from the Tioman coral reef system, Peninsular Malaysia
Ana Cecília da Cruz Pires, Vanessa Oliveira, Daniel Francis Richard Cleary, Ana Rita Moura Polónia, Francisco José Riso Costa Coelho, Zarinah Waheed, Nicole Joy de Voogd and Newton Carlos Marcial Gomes
- 744 A comparison of the prokaryotic communities associated with seven seaweed species, sediment, and seawater from the Penghu archipelago, Taiwan
Daniel F. R. Cleary and Yusheng M. Huang
- 762 Deep-sea smelts, pencil smelts, and barreleyes (Teleostei: Argentiniformes) from oceanic islands and seamounts off northeastern Brazil
Michael M. Mincarone, Júlia R. Martins, Fabio Di Dario, Leandro N. Eduardo, Thierry Frédou, Flávia Lucena-Frédou and Arnaud Bertrand
- 774 Zoogeographic patterns of Red Sea fishes – are they correlated to success in colonization of the Mediterranean via the Suez Canal?
Daniel Golani, Ronald Fricke and Brenda Appelbaum-Golani
