MAIN TOPIC

Cellular Models of Genetic Diseases

Matthias Rath and Ute Felbor

Cellular models of genetic diseases — 219

Karolina Plössl, Andrea Milenkovic, and
Bernhard H. F. Weber

**Challenges and opportunities for modeling
monogenic and complex disorders of the human
retina via induced pluripotent stem cell
technology — 221**

Aria Baniahmad

**Tumor spheroids and organoids as preclinical
model systems — 229**

Gökhan Yigit and Bernd Wollnik

**Cellular models and therapeutic perspectives in
hypertrophic cardiomyopathy — 235**

Cagla Cakmak and Hans Zempel

**A perspective on human cell models for
POLG-spectrum disorders: advantages and
disadvantages of CRISPR-Cas-based vs.
patient-derived iPSC models — 245**

Dariusz Skowronek, Robin A. Pilz,
Konrad Schwefel, Christiane D. Much, Ute Felbor,
and Matthias Rath

**Bringing CCM into a dish: cell culture models for
cerebral cavernous malformations — 251**

Marlen C. Lauffer

**Organ-on-a-chip technologies to study
neuromuscular disorders: possibilities,
limitations, and future hopes — 261**

BERICHTE AUS DER HUMANGENETIK

Personalia

**Nachruf Dr. med. Guntram Borck
23.1.1973–12.7.2021 — 269**

**Humangenetiker Stefan Mundlos erhält
Mendel-Medaille der Leopoldina — 271**

**Bericht über die 33. Tumorgenetische
Arbeitstagung (TGA) 2021 — 273**

BVDH-Verbandsmitteilungen — 277

Aktuelle Nachrichten — 281
