SPECIAL ISSUE: APPLICATION OF REMOTE SENSING AND GIS IN ENVIRONMENTAL STUDIES

Guest Editor: Professor Chunyang Lu

- 1 **Spatial balance degree evaluation model of land use based on regional collaborative remote sensing observation**
Huikai Zheng
- 18 **Dynamic prediction of urban landscape pattern based on remote sensing image fusion**
Shi-yi Cao and Xi-jun Hu
- 33 **Spatial distribution characteristics of urban landscape pattern based on multi-source remote sensing technology**
Sai Liu
- 49 **Research on dynamic simulation of land use change based on geographical weighted clue-S model**
Lede Niu and Mei Pan
- 62 **Spatial-temporal evolution of complex urban landscape pattern based on remote sensing technology**
Jia-Jun Yi and Yan-Xiang Xiao
- 77 **Dynamic remote sensing monitoring of land cover in ecological protection area based on GIS technology**
Wei Li, Chan Lu and Shi-Yi Cao
- 93 **The spatial pattern planning method of rural landscape based on remote sensing technology**
Hong-Tao Xing
- 107 **An integrated planning method for open space of urban street landscape based on remote sensing technology**
Yuan Shui and Lu Gan
- 120 **Extraction of carbon emission feature in urban residential area based on remote sensing technology**
Wentao Lei, Hui Yang and Miao Tang
