

CIELAB analysis and quantitative correlation of total anthocyanin content in European and Asian plums E. Rampáčková M. Göttingerová T. Kiss I. Ondrášek R. Venuta J. Wolf T. Nečas S. Ercisli	453
A combination of hot water and abscisic acid (ABA) biosynthesis inhibitor regulates ripening of Japanese apricot (<i>Prunus mume</i>) fruit H. Tomiyama Y. Goto P. Opio T. Saito K. Ohkawa H. Ohara S. Kondo	461
Alleviating effects of silicon on cadmium toxicity in ginger (<i>Zingiber officinale</i> Roscoe) Zijing Chen Jing Zhang Bili Cao Kun Xu	469
PmSOC1s and PmDAMs participate in flower bud dormancy of <i>Prunus mume</i> by forming protein complexes and responding to ABA Xue Yong Yuzhen Zhou Tangchun Zheng Kai Zhao Sagheer Ahmad Yushu Li Yu Han Jia Wang Tangren Cheng Qixiang Zhang	480
HPLC and direct photothermal techniques for quantification of β -carotene in sea buckthorn juices O. Dóka M. Máté D. Székely I. Jócsák G. Ficzek G. Simon G. Végvári	493
Modified atmosphere packaging films for qualitative storage of <i>Dimocarpus longan</i> fruit in Vietnam Le Thi Them Dang Xuan Cuong Tran Dinh Manh Nguyen Van Phong Nguyen Vo Son Binh	499
Growth and leaf morphology of hazelnut cultivars grown under semi-controlled conditions J. Toillon A. Paradinas M. Thomas	508
What is the level of fruit infestation by pulp-feeding insects? An overview of their meaning and measurement A. Benavídez M. Ordano P. Schliserman	520
Growth characteristics, carbon and nitrogen storage, and yield of Lanzhou lily (<i>Lilium davidii</i> var. <i>unicolor</i>) in response to fertilizer application level and planting density Yang Qiu Zhongkui Xie Yajun Wang Hailian Wei Lihua Zhang Cuiping Hua Jie Li Yubao Zhang	532
Proteome-wide identification of lysine succinylation in the proteins of <i>Eucommia ulmoides</i> Oliver leaves revealed its involvement in energy metabolism Chao Shen Xinzhuo Yao Degang Zhao Litang Lu	543
A case study on water use efficiency in extreme water-saving cultivation of tomato plants Qichen Li T. Sugihara S. Shibusawa Minzan Li	556
Salt stress in apple seedlings was mitigated by <i>n</i> -propyl dihydrojasmonate, a synthetic analog of jasmonic acid L. Wang S. Wang H. Tomiyama P. Opio H. Ohara K. Ohkawa T. Saito S. Kondo	567
