

FRUITS

International Journal of Tropical and Subtropical Horticulture

- The Fruit Fly Protect project and its actions regarding the evaluation of different traps and attractants for *Ceratitis capitata* Wied. in Azores
Thematic Issue
D.H. Lopes V. Costa E. Tarantino 261
- Bactrocera dorsalis*, an invasive fruit fly species in Mauritius
Thematic Issue
P. Sookar N. Patel P. Ramkalawon 269
- The attractiveness of locally made baits of plant origin for capturing *Bactrocera dorsalis* and *Ceratitis cosyra* on mango
Thematic Issue
V. Umeh O. Aiyelaagbe O. Shittu 276
- Parasitic fitness of a strain of *Diachasmimorpha longicaudata* (Hymenoptera, Braconidae) reared on irradiated larvae of a Vienna-8 strain of *Ceratitis capitata* (Diptera, Tephritidae)
Thematic Issue
B. Djellabi J. Herrero-Schell L. Ababsa M. Sekour F. Beitia 282
- The effectiveness of locally produced protein bait improved with papain in capturing fruit flies of mango
Thematic Issue
V.C. Umeh M.A. Olaniyi J. Manga 289
- Perception of fruit farmers on the occurrence of the oriental fruit fly *Bactrocera dorsalis* (Diptera: Tephritidae) and its associated economic impact in Manica province, Mozambique
Thematic Issue
L. Canhanga M. De Meyer D. Cugala M. Virgilio L. Bota M. Mwatawala 295
- Does fruit phenology influence trap-capture and emergence of *Ceratitis capitata* and *Bactrocera zonata* in commercial hosts?
Thematic Issue
I.R. El-Gendy J.A. Villanueva-Jimenez 303
- Host status of *Citrus hystrix*, *Citrus aurantifolia*, *Passiflora edulis* and *Litchi chinensis* for *Bactrocera dorsalis* (Tephritidae, Diptera) on Réunion Island
Thematic Issue
L. Moquet H. Delatte 310
