Editorial

Recent advances in grazed pasture-based dairy science

T. J. Clough 1

Research articles

Production, profit and nitrogen flows in irrigated dairy systems representing different industry development pathways: the Pastoral 21 experience in Canterbury
D. F. Chapman, D. E. Dalley, G. R. Edwards, K. C. Cameron, B. J. Malcolm, A. Clement, A. J. Romera, I. B. Pinxterhuis, P. C. Beukes, H. J. Di, R. H. Bryant and J. Curtis

3

Effect of a late summer diet change from pasture to brassica crop and silages on dairy cow milk production and urinary nitrogen excretion

N. Kyamanywa, I. M. Tait, C. M. Mitchell, M. J. Hedley, D. Pacheco and P. Bishop 36

Short communication

There is no relationship between plasma amino acid concentration and urinary nitrogen concentration in heifers fed plantain or ryegrass

I. Rugoho, G. Judson, G. Edwards and L. Cheng 56

Research articles

Genetic parameters for efficiency of crude protein utilisation and its relationship with production traits across lactations in grazing dairy cows

H. B. P. C. Ariyaratne, M. Correa-Luna, H. T. Blair, D. J. Garrick and N. Lopez-Villalobos 62

Linear versus seasonal growth of dairy heifers decreased age at puberty but did not affect first lactation milk production

R. C. Handcock, C. M. C. Jenkinson, R. Laven, L. R. McNaughton, N. Lopez-Villalobos, P. J. Back and R. E. Hickson 83

Effect of DGAT1 variant (K232A) on milk traits and milk fat composition in outdoor pasture-grazed dairy cattle

Y. Li, H. Zhou, L. Cheng, G. R. Edwards and J. G. H. Hickford 101

Short communication

Effects of bovine leptin gene variation on milk traits in New Zealand Holstein-Friesian × Jersey-cross dairy cows

I. L. Haruna, Y. Li, H. Zhou and J. G. H. Hickford 114

Brief report

Genetic parameters across milking frequency for first lactation milk production traits in New Zealand

F. Lembeye, N. López-Villalobos, J. L. Burke and S. R. Davis 122

Research article

Selection scheme designs for dairy cattle milked once daily in New Zealand: a deterministic approach

F. Lembeye, N. López-Villalobos, J. L. Burke and S. R. Davis 127
