

CONTENTS

Functional characterisation of lenticels, micro-cracks, wax patterns, peel tissue fractions and water loss of pomegranate fruit (cv. Wonderful) during storage R. Lufu, A. Ambaw and U.L. Opara (South Africa)	111539	Polyamine treatment ameliorates pericarp browning in cold-stored 'Nanguo' pears by protecting mitochondrial structure and function J. Li, M. Luo, X. Zhou, Q. Zhou, B. Wei, S. Cheng and S. Ji (People's Republic of China)	111553
Heat stress alters the transcriptome of <i>Debaryomyces hansenii</i> and reduces its biocontrol activity against postharvest gray mold on kiwifruit Y. Dai, Z. Wang, J. Leng, Q. Wang and J. Liu (China)	111541	Endogenous melatonin generation plays a positive role in chilling tolerance in relation to redox homeostasis in litchi fruit during refrigeration J. Liu, J. Sun, Y. Pan, Z. Yun, Z. Zhang, G. Jiang and Y. Jiang (PR China)	111554
Strigolactone maintains strawberry quality by regulating phenylpropanoid, NO, and H ₂ S metabolism during storage D. Huang, Y. Wang, D. Zhang, Y. Dong, Q. Meng, S. Zhu and L. Zhang (China)	111546	<i>NAC</i> transcription factors <i>SNAC4</i> and <i>SNAC9</i> synergistically regulate tomato fruit ripening by affecting expression of genes involved in ethylene and abscisic acid metabolism and signal transduction S. Yang, J. Zhou (People's Republic of China), C.B. Watkins (USA), C. Wu, Y. Feng, X. Zhao, Z. Xue and X. Kou (People's Republic of China)	111555
Possibilities of modified atmosphere packaging to prevent the occurrence of internal fruit rot in bell pepper fruit (<i>Capsicum annuum</i>) caused by <i>Fusarium</i> spp M. Frans, R. Aerts, N. Ceusters, S. Luca and J. Ceusters (Belgium)	111545	Redox proteomic analysis reveals the involvement of oxidative post-translational modification in tomato fruit ripening P. Wang, X. Li, Y. Wang, W. Wang, S. Tian and G. Qin (China)	111556
Electron beam radiation delayed the disassembly of cell wall polysaccharides in harvested mangoes T.T. Nguyen (Thailand, Viet Nam), M. Kato, G. Ma, L. Zhang (Japan), A. Uthairatanakij, V. Srilaong, N. Laohakunjit and P. Jitareerat (Thailand)	111544	The role of ethylene and abscisic acid in kiwifruit ripening during postharvest dehydration W. Huang (China), D. Billing, J. Cooney, R. Wang and J. Burdon (New Zealand)	111559
Assessment of pre- and post-harvest anti-sprouting treatments to replace CIPC for potato storage M. Visse-Mansiaux (Switzerland, Belgium), M. Tallant (Switzerland), Y. Brostaux, P. Delaplace, H. Vanderschuren (Belgium) and B. Dupuis (Switzerland)	111540	<i>FaMYB11</i> promotes the accumulation of volatile esters by regulating <i>FaLOX5</i> during strawberry (<i>Fragaria x ananassa</i>) ripening H. Lu, Z. Luo, D. Li (China), Y. Jiang (United Kingdom) and L. Li (China)	111560
Transcriptome analysis of postharvest grapes in response to <i>Talaromyces rugulosus</i> O1 infection M. Xu, X. Zhang, D. Li, X. Gu, E.A. Godana, S. Dhanasekaran, L. Zhao and H. Zhang (China)	111542	Salicylic acid inhibits the postharvest decay of goji berry (<i>Lycium barbarum</i> L.) by modulating the antioxidant system and phenylpropanoid metabolites H. Zhang, F. Liu, J. Wang, Q. Yang, P. Wang, H. Zhao, J. Wang, C. Wang and X. Xu (China)	111558
Pre-cut NaCl solution treatment effectively inhibited the browning of fresh-cut potato by influencing polyphenol oxidase activity and several free amino acids contents Y. Ma, H. Wang, H. Yan (China), A.U. Malik (Pakistan), T. Dong and Q. Wang (China)	111543
