

CONTENTS

Research Report

- B. Miladinović, S. Branković, S. Živanović, M. Kostić, K. Šavikin, B. Đorđević, D. Stojanović,
M. Milutinović, N. Kitić and D. Kitić
Flavonols composition of *Ribes nigrum* L. juices and their impact on spasmolytic activity 171

Research Report

- C. Royo, P. Carbonell-Bejerano, R. Torres-Pérez, J. Freire, J. Ibáñez,
J.M. Martínez-Zapater and M. Vilanova
Is aromatic terpenoid composition of grapes in Northwestern Iberian wine cultivars
related to variation in VvDXS1 gene? 187

Research Report

- I. Hininger-Favier, N. Thangthaeng, D.F. Bielinski, D.R. Fisher, S.M. Poulouse and B. Shukitt-Hale
Blueberries and insulin protect microglial cells against high glucose-induced inflammation
and restore GLUT-1 201

Research Report

- G. Li, R. Quan, S. Cheng, X. Hou and H. Hu
An HD-Zip transcription factor, VvHDZ4, in grapes (*Vitis vinifera* L.) confers enhanced drought
tolerance in transgenic tomato 217

Research Report

- P.B. Venkatasubramanian, E. Oosterink, M.M.M. Tomassen, M. Suarez-Diez, J.J. Mes,
E. Saccenti and N.J.W. de Wit
Transcriptome-based identification of the beneficial role of blackcurrant, strawberry
and yellow onion to attenuate the cytopathic effects of *Clostridium difficile* toxins 231

Research Report

- W. Younis, Alamgeer, V.B. Schini-Kerth, M.A. Farooq, M. Althobaiti and R.E. Roberts
Hawthorn berry (*Crataegus songarica*) causes endothelium-dependent relaxation
of the porcine coronary artery: Role of Estrogen receptors 249

Research Report

- L. Duarte, J. Quezada, L.A. Ramirez, K. Vasquez, J.F. Orellana, V. Villanueva,
F. Perez-Bravo and D.F. Garcia-Diaz
The treatment with an extract from Calafate (*Berberis microphylla*) induces transcript and protein expression
of molecules involved in thermogenesis and adipocyte browning in adipose tissue from obese mice 267

Research Report

- S. Bakir, E. Capanoglu, R.D. Hall and R.C.H. de Vos
Natural diversity in health related phytochemicals in Turkish tomatoes 279

Research Report

- Y. Wu, C. Zhang, W. Wu, W. Li and L. Lyu
Genome-wide identification and analysis of the MADS-box gene family and its potential
role in fruit ripening in black raspberry (*Rubus occidentalis* L.) 301

Research Report

- Y. Lin, C. Wang, X. Wang, M. Yue, Y. Zhang, Q. Chen, M. Li, Y. Luo, Y. Zhang,
Y. Wang, X. Wang and H. Tang
Comparative transcriptome analysis reveals genes and pathways associated
with anthocyanins in strawberry 317

Research Report

- T. Mu, Y. Guan, T. Chen, S. Wang, M. Li, A.K. Chang, Z. Yang and X. Bi
Black raspberry anthocyanins protect BV2 microglia from LPS-induced inflammation
through down-regulating NOX2/TXNIP/NLRP3 signaling 333

Research Report

H.Song, X. Shen, Q. Chu and X. Zheng

Red raspberry (poly)phenolic extract improves diet-induced obesity, hepatic steatosis
And insulin resistance in obese mice 349
