## DISEASES

- Effects of *Meloidogyne incognita*, *Pseudomonas syringae* pv. *psii* and *Rhizobium leguminosarum* inoculated alone, simultaneously, and sequentially, on the growth and biochemical parameters of pea (*Pisum sativum*) in three soil types  
*Deeksha Kashyap and Zaki Anwar Siddiqui*..... 111
- In vitro* variation in pathogenicity of *Fusarium* species causing head blight in relation to their isolation from barley head  
*Nachaat Sakr* ..... 133

## PESTS

- Monitoring of three *Hoplocampa* sawfly species in plum orchards  
*Zsolt Kárpáti, Csengele Bognár, Erzsébet Voigt, Miklós Tóth and Béla Péter Molnár*..... 143
- Residual toxicity of selected insecticides on *Aphis gossypii* and their safety limits on honeybees  
*Wael M. Khamis, Khaled M. A. Abdel-Hameed and Ahmed M. El-Sabrouh*..... 153
- Efficacy of some chemical insecticides and plant extracts combined with *Bacillus thuringiensis* against *Phthorimaea operculella*  
*Fereshteh Khorrami and Asmar Soleymanzade*..... 169
- New occurrences of the ragweed leaf beetle (*Ophraella communa* LeSage, 1986) (Coleoptera, Chrysomelidae) in Hungary  
*Jenő Kontschán, Viktor Kerezi, Gábor Bozsik and Balázs Kiss*..... 181
- A review of the plant bug genus *Macrotylus* distributed in Hungary (Heteroptera: Miridae)  
*Péter Kóbor* ..... 187
- Acanalonia conica* (Say, 1830): A new alien planthopper species established in Hungary (Auchenorrhyncha: Fulgoroidea: Acanaloniidae)  
*Péter Kóbor, Előd Kondorosy, Csaba Nagy and András Orosz*..... 201
