## Contents

<b>A new method for a simplified comparison of gentle conveyance properties of centrifugal pumps for breweries</b> <i>P. Zeuschner, J. Fischer, M. Holewa and R. Pahl</i> ..... 1	<b>A method for the determination of hop diastatic power – part I</b> <i>P. C. Wietstock, T. Luetzenberger, M. Biendl, B. Gibson</i> ..... 92
<b>Assay for detecting technical proteolytic enzymes in beer</b> <i>M. Kupetz, T. Heinrich, M. Gastl and T. Becker</i> ..... 10	<b>Influence of temperature on the filter cake resistance in a lauter tun</b> <i>M. Hennemann, M. Gastl and T. Becker</i> ..... 100
<b>Identification of marker volatiles in malt to predict malt-derived aroma properties of bottom-fermented beers</b> <i>M. Féchir, T. Kraus-Weyermann and J. Voigt</i> ..... 17	<b>Determination of free amino nitrogen in beer mash with an inline NIR transfectance probe and data evaluation by machine learning algorithms</b> <i>P. Wefing, F. Conradi, J. Rämisch, P. Neubauer and J. Schneider</i> ..... 107
<b>Microbial fuel cells for brewery wastewater treatment – efficiency requirements and treatment performance</b> <i>S. Brunschweiger, L. Hörner, T. Hofmann and K. Glas</i> ..... 27	<b>CaCO<sub>3</sub> deposits in reverse osmosis Part I – Shortcomings of current approaches leading to a new prediction model and monitoring device</b> <i>S. Hager, A. Bachmann, T. Hofmann, R. Engelbrecht and K. Glas</i> ..... 122
<b>Molecular basis and regulation of flocculation in <i>Saccharomyces cerevisiae</i> and <i>Saccharomyces pastorianus</i> – a review</b> <i>K. Seibel, R. Schmalhaus, M. Haensel and F. Weiland</i> ..... 39 <b>YEAST SPECIAL</b>	<b>Blending of hard seltzer and other flavor intensive beverages inline vs. batch – with a focus to the flavor-losses</b> <i>R. Feilner, S. Höller, T. Kunz and H. Scheuren</i> ..... 134
<b>Sanitation of wooden barrels for ageing beer – a review</b> <i>T. Kocijan, S. Bossaert, G. Van Boeckel, G. De Rouck, B. Lievens and S. Crauwels</i> ..... 51 <b>YEAST SPECIAL</b>	<b>Influence of hop bitter acids and their derivatives on beer foam stability evaluated using customer-oriented Foam Collapse Time (FCT) method</b> <i>K. Takoi</i> ..... 141 <b>HOP SPECIAL</b>
<b>Sulfur substances of hop oils and identification of hop varieties – advantages and limitations</b> <i>K. Krofta, J. Patzak, P. Vondráčková and L. Mravcová</i> ..... 63	<b>An approach to develop an external dry hopping method by restoring the aroma transfer through dilution</b> <i>M. Kohles, F. Gutsch, M. Zarnkow, F. Jacob, R. Noyy and C. Schönberger</i> ..... 151 <b>HOP SPECIAL</b>
<b>Key factors of brewery wastewater influencing treatment efficiency and power output of microbial fuel cells</b> <i>S. Brunschweiger, V. Kranich, R. Haseneder, T. Hofmann and K. Glas</i> ..... 71	<b>The impact of climatic conditions on the biogenesis of various compounds in hops</b> <i>A. Forster, A. Gahr, F. Schüll and J. Bertazzoni</i> ..... 160 <b>HOP SPECIAL</b>
<b>Assessing the effects of packed beds on lautering performance and wort quality</b> <i>P. M. Bandelt Riess, J. A. Bertazzoni Streit, M. Kuhn, H. Briesen and P. Först</i> ..... 82	<b>Hop extracts to provide functional and tunable haze to bright beer and design specialty styles</b> <i>T. Bissoonauth, G. Fisher, D. Hall, C. Wilson and P. Oliveira</i> ... 172 <b>HOP SPECIAL</b>
<b>Nitrogen fertility practices in the field influence the accumulation of nitrate during the production of hop-forward beer</b> <i>T. H. Shellhammer, S. R. Lafontaine, A. E. Iskra, J. Clawson, K. M. Trippe, C. L. Phillips and D. H. Gent</i> ..... 88
