

---

## Editorial

---

1069 Behaviour as leverage

---

## Comments

---

1070 Designing insurance for climate change

*Katherine R. H. Wagner*

---

1073 Effective carbon taxes need green nudges

*Christina Gravert & Ganga Shreedhar*

---

1075 The why and how of assigning responsibility for supply chain emissions

*Sanjith Gopalakrishnan*

---

## Viewpoint

---

1078 African perspectives on climate change research

*Maha Al-Zu'bi et al.*

---

## Research highlights

---

1085 Our choice from the recent literature

---

## News & views

---

1086 *Research funding*  
Academia–industry ties under scrutiny

*Maria Sharmina*

---

1088 *Water resources*  
American Cordillera snow futures

*Isabel Cristina Hoyos Rincón*

---

1090 *Hydrology*  
Floods differ in a warmer future

*Conrad Wasko*

---

## Policy brief

---

1092 *International climate policy*  
The path to 1.5°C requires ratcheting of climate pledges

*Gokul Iyer et al.*

---

## Research briefings

---

1094 Climate polarization is increasing on Twitter

---

---

1096 Analysing the 2021 North American heatwave to understand extraordinary heat events

---

1098 Populations adapt more to temperature in the ocean than on land

---

## Perspective

---

1100 Radical interventions for climate-impacted systems

*Tiffany H. Morrison et al.*

---

## Brief communication

---

1107 Policy sequencing towards carbon pricing among the world's largest emitters

*Manuel Linsenmeier, Adil*

*Mohammad & Gregor Schwerhoff*

---

1111 Large uncertainty in future warming due to aerosol forcing

*Duncan Watson-Parris &*

*Christopher J. Smith*

---

## Articles

---

1114 Growing polarization around climate change on social media

*Max Falkenberg et al.*

*See RB p1094*

---

1122 Favourability towards natural gas relates to funding source of university energy centres

*Douglas Almond, Xinming Du &*

*Anna Papp*

*See N&V p1086*

---

1129 Ratcheting of climate pledges needed to limit peak global warming

*Gokul Iyer et al.*

*See PB p1092*

---

1136 Adaptive emission reduction approach to reach any global warming target

*Jens Terhaar, Thomas L. Frölicher,*

*Mathias T. Aschwanden, Pierre*

*Friedlingstein & Fortunat Joos*

---

---

**1143 2021 North American heatwave amplified by climate change-driven nonlinear interactions**

*Samuel Bartusek, Kai Kornhuber & Mingfang Ting*  
*See RB p1096*

---

**1151 Asymmetric emergence of low-to-no snow in the midlatitudes of the American Cordillera**

*Alan M. Rhoades et al.*  
*See N&V p1088*

---

**1160 Reconciling disagreement on global river flood changes in a warming climate**

*Shulei Zhang et al.*  
*See N&V p1090*

---

**1168 Younger trees in the upper canopy are more sensitive but also more resilient to drought**

*Tsun Fung Au et al.*

---

## **Analysis**

---

**1175 Greater evolutionary divergence of thermal limits within marine than terrestrial species**

*Matthew Sasaki et al.*  
*See RB p1098*
