Preface	vii
Chapter 1	The Hollow Magic of Humic Substances as an Essential Environmental Component for Human Life. The Debatable Points: Humification Process and Humic Substance’s Properties	1
	Mohamed Hafez, Alexander I. Popov, Tatiana Minkina, Vishnu D. Rajput, Song Ge, Kseniya I. Tsivka, Ahmed M. Abdallah and Mohamed Rashad	
Chapter 2	Built Environment for Sustainable and Resilient Cities	57
	Deepty Jain, Smriti Bhatnagar, Mythili Madhavan and Aditya Rahul	
Chapter 3	Engineered Microalgae in Bioremediation	99
	Wafaa Fathi Zohir, Promita Deb, Santhosh Kumar Kookal, Mohamed Hafez, Ashok Ganesan, Ahmed M. Abdallah and Shashi Kumar	
Chapter 4	Research Trends on Biodegradation of Organic Pollutants and Removal of Metals in Constructed Wetlands Integrated to Microbial Fuel Cells (CW – MFC)	133
	Claudia Guerrero-Barajas, Miriam L. Carbajal-Pedraza, Vanessa A. León-Ortega and Alberto Ordaz	

Chapter 5	Technologies for Recycling Lithium-Ion Batteries from Electric Vehicles	165
	Juan Castro, Dolores Hidalgo and Marta Gómez	
Chapter 6	Chlorides and Drinking Water Safety	195
	Xi Li, PhD, Sheng Chen, Shengda Wang and Chuchu Zhang	
Chapter 7	Climate Change and the Dilemma of Food Insecurity in the Tropics	225
	Da'u Abba Umar	
Chapter 8	Review on the Application of Dimethylether for Enhanced Oil Recovery	243
	Young Woo Lee, Hye Seung Lee and Kun Sang Lee
