BEE MANAGEMENT

Supplemental feeds and foraged corn grain dust: a comparison of the number of days survived in vitro by young adult honey bees (*Apis mellifera*)

Kathryn Thompson and Bryan T. Drew

1

Acaricidal activity of *Mentha suaveolens* subsp. *timija*, *Chenopodium ambrosioides*, and *Laurus nobilis* essential oils, and their synergistic combinations against the ectoparasitic bee mite, *Varroa destructor* (Acari:Varroidae)

Abdessamad Aglagane, El-Mustapha Laghzaoui, Bouchra Soulaïmani, Omar Er-Rguibi, Abdelaziz Abbad, El Hassan El Mouden, and Mohamed Aourir

9

Maximizing income through beekeeping (*Apis mellifera*) by following right management practices

Sumit Saini, O. P Chaudhary, and Vadde Anoosha

19

TOXICOLOGY

Selection of stable reference genes for real-time quantitative PCR in honey bee pesticide toxicity studies

Sanghyeon Kim, Susie Cho, and Si Hyeock Lee

26

Effects of abamectin and acetamiprid pesticides on the survival and behavior of *Scaptotrigona* aff. *xanthotricha* (Apidae, Meliponini)

Maria Fernanda de Oliveira Ferreira, Rafael de Fraga, Emerson Cristi de Barros, and Solange Cristina Augusto

37

PATHOLOGY AND PARASITOLOGY

Chitosan-based gel application on model bees (*Apis mellifera* L.) for healing bite wounds caused by *Varroa destructor*

Aslı Özkırım and Billur Küçüközmen

45

The sporicidal activity of chlorine dioxide gas on *Paenibacillus larvae* spores

Osama S. Mahdi, Kendra J. Greenlee, Ethan Rose, Joseph P. Rinehart, and David J. Smith

52

The trypanosome *Lotmaria passim* prevails in honey bees of different ages and stages of development

Nolberto Arismendi, María Paz Castro, Marisol Vargas, Camila Zapata, and Gustavo Riveros

63

HIVE PRODUCTS SCIENCE

Chemical and microbiological characterization of “samburá” from two stingless bee species

Carla Miquez Souza, Samira Maria Peixoto Cavalcante da Silva, Andreia Santos do Nascimento, Fabiane de Lima Silva, Adriana Regina Bagaldo, and Carlos Alfredo Lopes de Carvalho

70

Use of the electronic tongue as a tool for the characterization of *Melipona scutellaris* Latreille honey

Andreia Santos do Nascimento, Fabiane de Lima Silva, Cerilene Santiago Machado, Samira Maria Peixoto Cavalcante da Silva, Leticia M. Estevinho, Luís G. Dias, Carlos Alfredo Lopes de Carvalho

79

Physicochemical parameters of liquid and spray-dried honey of stingless bee *Scaptotrigona pectoralis*

Karla Leyva-Moguel, Odri Sosa-Moguel, Jorge A Pino, Daniel Bolivar-Moreno, and Luis Cuevas-Glory

91

Chemical profile of Greek *Arbutus unedo* honey: biological properties

Konstantia Graikou, Argyro Andreou, and Ioanna Chinou

100

PHYSIOLOGY, BIOCHEMISTRY, AND CHEMICAL ECOLOGY

Simple methods of analyzing proteins and amino acids in small pollen samples

Aoi Nikkeshi, Kazumu Kuramitsu, Tomoyuki Yokoi, and Keiko Yamaji

107

Histomorphological description of the reproductive system in mated honey bee queens

Ivanna V. Kozii, Sarah C. Wood, Roman V. Koziy, and Elemir Simko

114

Environmental factors affect melezitose production in honeydew from aphids and scale insects of the order Hemiptera

Victoria Charlotte Seeburger, Basel Shaaban, Karsten Schweikert, Gertrud Lohaus, Annette Schroeder, and Martin Hasselmann 127

SOCIOBIOLOGY AND BEHAVIOUR

Male strategies and mating behavior in the Neotropical bee *Epicharis (Anepicharis) dejeanii* (Apidae: Centridini)

Welber Costa Pina, Lenice Souza-Shibatta, Natalia Uemura, André Luiz Gobatto, Gabriele Antico Freiria, and Silvia Helena Sofia 138

A computational approach to tracking age-based task frequency distributions of *Apis mellifera* worker cohorts

Lewis J. Bartlett, Selina Bruckner, Deborah A. Delaney, Geoffrey R. Williams, and Keith S. Delaplane 147
