

- 249 **Prediction method of pollutant release rate of building materials based on characteristic constraints**
Hongwei Jia
- 260 **Total indoor environmental pollutant control of intelligent building based on dynamic CGE**
Peng Du
- 273 **Evaluation method of solid construction waste recycling capacity based on AHP-fuzzy algorithm**
Xiaohua Zhang, Jiayue Xing, Zong Gao and Hongyu Zhang
- 285 **Rapid decomposition of organic pollutants in chemical nanocomposites**
Zhi Song, Bo-xia Liu and Yao-yao Chen
- 298 **Air harmful gas concentration monitoring method based on particle filter algorithm**
Zhengyan Qin
- 310 **An ecological environmental carrying capacity estimation of tourist attractions based on structural equation**
Xiaoyan Wu
- 324 **Analysis on the coupling degree of water source ecological environment based on 3S technology**
Zhouheng Fan
- 337 **Modelling of the impact of land planning and development on regional ecological environment**
Lede Niu, Anlin Li, Liran Xiong and Yan Zhou
