

Contents

- 351 **Optimising and investigating the effect of leaf area index, soil depth, and water content on energy conservation and pollutant reduction in green roof systems (case study: Mashhad City)**
Mohammad Reza Seyedabadia, Mohsen Karrabi, Javad Abdollahi and Hossein Kazemian
- 366 **Eco-friendly disposal of municipal solid waste and a contribution to energy crisis in India – a case study**
Chintak Kamallesh Parashar, Partha Das, Subho Samanta, Priyabrata Banerjee, Amit Ganguly, Shibendu Shekhar Roy and Pradip Kumar Chatterjee
- 388 **Current status of e-waste management in Vietnam**
Nguyen Trung Thang, Sunil Herat and Duong Thi Phuong Anh
- 406 **Impact of COVID-19 restrictive precautions on air quality: case of Zonguldak, Turkey**
Rabia Köklü, Burçin Atılğan Türkmən, Ece Ümmü Deveci and Çağdaş Gönen
- 427 **A preliminary study on the relationship between environmental constraints, technological innovation and economic development in China – based on the development level and degree of coordination of the combined system**
Mingran Wu and Weidong Huang
- 445 **Design and simulation-based optimisation of a renewable energy system consisting of wind and hydrogen for the purpose of reliable electrification**
Mojtaba Nedaei, Maurizio Faccio, Marco Bortolini and Mauro Gamberi
