## Editorials

---

**1145** *Careering ahead*

---

**1146** *The Global Stocktake at COP28*

---

## Comments

---

**1148** **Embracing climate emotions to advance higher education**  
*Peter T. Pellitier, Michelle Ng, Sierra R. Castaneda, Susanne C. Moser & Britt D. Wray*

---

**1151** **Essential but challenging climate change education in the Global South**  
*Jieqi Ma & Yongqin David Chen*

---

**1154** **Embedding climate change education into higher-education programmes**  
*Anil Padhra & Elham Tolouei*

---

**1158** **The need to operationalize climate modelling**  
*Christian Jakob, Andrew Gettelman & Andrew Pitman*

---

## Research highlights

---

**1161** *Our choice from the recent literature*

---

## News & views

---

**1162** ***Just transition***  
**How energy transition affects jobs**  
*Greg Muttitt & Philip Gass*

---

**1164** ***West Antarctica***  
**Committed future ice-shelf melt**  
*Taimoor Sohail*

---

**1166** ***Future seafood***  
**Climate change is impacting nutritional security from seafood**  
*Stefanie M. Colombo*

---

## Research briefings

---

**1168** *Global climate adaptation assessed by structured expert judgement for coastal areas*

---

**1170** *Upward revision of the social costs of methane and nitrous oxide*

---

## Perspectives

---

**1172** **Realizing the social value of impermanent carbon credits**  
*Andrew Balmford et al.*

---

**1179** **Priority science can accelerate agroforestry as a natural climate solution**  
*Drew E. Terasaki Hart et al.*

---

## Matters arising

---

**1191** **Detecting long-term Arctic surface water changes**  
*Ian Olthof, Robert H. Fraser, Jurjen van der Sluijs & Hana Travers-Smith*

---

**1194** **Reply to: Detecting long-term Arctic surface water changes**  
*Elizabeth E. Webb, Anna K. Liljedahl, Michael M. Loranty, Chandi Witharana & Jeremy W. Lichstein*

---

## Articles

---

**1197** **Free riding in climate protests**  
*Johannes Jarke-Neuert, Grisca Perino & Henrike Schwickert*

---

**1203** **Distributional labour challenges and opportunities for decarbonizing the US power system**  
*Judy Jingwei Xie, Melissa Martin, Joeri Rogelj & Iain Staffell*  
*See N&V p1162*

---

**1213** **Status of global coastal adaptation**  
*Alexandre K. Magnan et al.*  
*See RB p1168*

---

**1222** **Unavoidable future increase in West Antarctic ice-shelf melting over the twenty-first century**  
*Kaitlin A. Naughten, Paul R. Holland & Jan De Rydt*  
*See N&V p1164*

---

---

**1229 The decrease in ocean heat transport in response to global warming**

*Jennifer V. Mecking & Sybren S. Drijfhout*

---

**1237 Soil heat extremes can outpace air temperature extremes**

*Almudena García-García et al.*

---

**1242 Climate change exacerbates nutrient disparities from seafood**

*William W. L. Cheung et al. See N&V p1166*

---

## Analysis

---

**1250 A global assessment of actors and their roles in climate change adaptation**

*Jan Petzold et al.*

---

**1258 Damage function uncertainty increases the social cost of methane and nitrous oxide**

*Tianpeng Wang & Fei Teng See RB p1170*

---

**1266 Reproducibility crisis and gravitation towards a consensus in ocean acidification research**

*Sean D. Connell & Jonathan Y. S. Leung*

---

## Amendments

---

**1272 Author Correction: Sea-ice-free Arctic during the Last Interglacial supports fast future loss**

*Maria-Vittoria Guarino et al.*

---

**1272 Author Correction: China's bulk material loops can be closed but deep decarbonization requires demand reduction**

*Lulu Song et al.*

---

**1272 Publisher Correction: Increasing impact of warm droughts on northern ecosystem productivity over recent decades**

*David Gampe et al.*

---
