

AGRICULTURAL ECONOMICS AND MANAGEMENT

M. Lanfranchi, C. Giannetto, V. Dimitrova and A. De Pascale – Willingness to adopt and disseminate projects related to the “twin transition” on an area. The farmer’s perspective.....	207
Denisa Gajdová – Perspectives of agricultural cooperatives re-development after Covid 19 pandemic in Slovakia	216
Hary Satria Wanto – Sustainable agricultural policy strategy through increasing food crop productivity in Indonesia.....	223
Eliza Uzunova, Javor Markov, Angelina Ivanova, Stanka Delcheva and Tania Hubenova – Economy and diversity of aquaculture production in Bulgaria: status and trends	229
Arben Musliu, Behlul Behluli, Blenda Fazliu, Yllka Dibrani, Shpend Kokolli and Leonart Gashi – Production efficiency estimation of Kosovo beef fattening farms	243
Angel Sarov and Diana Kopeva – The Bulgarian model of land ownership: the “white plot” phenomenon.....	248

AGROECOLOGY

Kostadin Dochin – Using phytoplankton as a tool for evaluating changes in the ecological status of two Bulgarian reservoirs (2020–2021).....	252
---	-----

AGROCHEMISTRY AND SOIL SCIENCE

Gergana Kuncheva, Milena Kercheva, Evgeni Enchev, Tsvetina Paparkova and Viktor Kolchakov – Factors controlling water-stable macroaggregation of Kastanozems exposed to water erosion.....	262
---	-----

PLANT SCIENCE

I. Anikina and K. Issayeva – Use of the preparation based on solanum nigrum as a potato yield stimulator	272
Kaoutar Aouass and Lahcen Kenny – Nitrogen use efficiency and yield of broccoli crop fertilized with compost and synthetic fertilizer in arid region of Morocco	277
Sonya Doneva, Hristo Stoyanov and Nikolay Neykov – Composition of gluten proteins of hexaploid triticale varieties from different origin	285
Penka Filyova, Vinelina Yankova and Velichka Todorova – Influence of economically important diseases and pests on the yield of pepper varieties and breeding lines (<i>Capsicum annuum</i> L.) grown in organic conditions.....	296
E. Kolentsova, A. Mitkov, N. Nguyen, T. Tonev, K. Ivanov – Agronomic response of maize hybrids to foliar fertilization with nanosized zinc hydroxy nitrate	304
Mariya Sabeva, Alexander Matev, Katya Uzundzhalieva, Stanislav Stamatov, Zlatina Ur, Bilyana Harizanova-Petrova, Radost Petrova and Nikolay Minev – Influence of irrigation in different phenophases on the chemical composition of soybean grains	312
Liana Relina, Oleh Suprun, Liubov Kobyzeva, Olha Vazhenina, Valeriia Kolomatska, Olha Bezuhla, Nina Ilchenko and Liudmyla Vecherska – Fatty acids composition and physical characteristics of chickpea seeds	320

PLANT GENETICS

- Cigdem Cicek Bulguroglu, Fatma Aykut Tonk, Deniz Istipliler and Muzaffer Tosun** – Dwarfing gene *Rht4* and its effects on key agronomic and coleoptile traits in bread wheat..... 332
- G. Desheva and E. Valchinova** – Morpho-agronomic assessment of genetic diversity among rye accessions using multivariate analyses..... 338

PLANT PROTECTION

- Iliana Ivanova, Diana Marinova, Daniela Kertikova and Anna Ilieva** – Study on the chemical composition of alfalfa varieties attacked by *Uromyces striatus* Schroter..... 351

ANIMAL SCIENCE

- Evgeniya Achkakanova and Ivan G. Penchev** – Effect of birth type on slaughter characteristics of Ile-de-France lambs..... 359
- Tran Thi Hoan and Tu Quang Hien** – Partial replacement of maize by root and leaf meal of cassava in diets of laying hens 365

ANIMAL GENETICS

- Radena Nenova, Ivona Dimitrova, Nevyana Stancheva, Milena Bozhilova-Sakova, Todor Tzonev and Tanya Minkova** – Genetic markers associated to improving prolificacy of sheep. A review..... 371
- Radostina Stoykova-Grigorova, Katerina Stefanova and Milena Bozhilova-Sakova** – Genetic variability in myostatin (MSTN) and ryanodine (RYR1) receptor genes in crossbred pigs Youna x Pietrain..... 378
- Krum V. Nedelkov** – A new approach for processing and use of sunflower meal 384

FOOD SCIENCE AND TECHNOLOGIES

- Tsonka Odzhakova and Silviya Ivanova** – Influence of the breed on the physicochemical characteristics, fatty acid composition of sheep's milk and consumption of biologically active and trans fatty acids in the Rhodopes 390
