

CONTENTS

108292

Amyloid-like aggregation influenced by lead(II) and cadmium(II) ions in hen egg white ovalbumin

Nemanja Mijin, Jelica Milošević, Sanja Stevanović, Predrag Petrović, Aleksandar Lolić, Tomaz Urbic and Natalija Polović

108315

Protein nanofibrils from mung bean: The effect of pH on morphology and the ability to form and stabilise foams

Anja Herneke, Saeid Karkehabadi, Jing Lu, Christofer Lendel and Maud Langton

108289

Changes in structure and emulsifying properties of coconut globulin after the atmospheric pressure cold plasma treatment

Yang Chen, Mengying Yao, Tianyi Yang, Yajing Fang, Dong Xiang and Weimin Zhang

(contents continued from outside back cover)

108302

The gel mechanism and carrier quality of fibrous and granular whey protein self-assembly

Ying Wu, Jingjing Wu, Xiaolin Meng, Lei Zhou, Wei Liu, Chengmei Liu, Sangeeta Prakash and Junzhen Zhong

108303

The interfacial destabilization of bile salt-emulsified oil droplets, essential for lipase function, is mediated by *Lycium barbarum* L. leaf polysaccharides

Na Zhang, Xue Han, Rumeng Yu, Xiaomin Tang, Bo Zhang, Yanyan Zhang, Xiaoyu Yin, Wenrui Ni, Mengze Wang, Bolin Zhang and Junfeng Fan

108306

Different effects of radio frequency and heat block treatments on multi-scale structure and pasting properties of maize, potato, and pea starches

Dingting Zhou, Gaoji Yang, Yingqi Tian, Jiayi Kang and Shaojin Wang

108305

Characterization of silver nanoparticles loaded chitosan/polyvinyl alcohol antibacterial films for food packaging

Danmin Yang, Qun Liu, Yahui Gao, Shoumei Wan, Fanrong Meng, Wuyin Weng and Yucang Zhang

108304

Unexpected morphological modifications in high moisture extruded pea-flaxseed proteins: Part I, topological and conformational characteristics, textural attributes, and viscoelastic phenomena

Fatemeh Riazi, Mostafa Mazaheri Tehrani, Volker Lammers, Volker Heinz and Sobhan Savadkoohi

108298

Pickering emulsion stabilized by linear dextrans: Effect of the chain length

Yuechun Zhu, Chao Yuan, Bo Cui, Li Guo and Meng Zhao
